AUTHOR INDEX

VOLUME XXVIII: JANUARY–JUNE

[Numbers in brackets refer to Russian original]

Abdurakhmanov, A. A. (see Imanov, L. M.)–136 [251]

Abrosimov, G. V. (see Korolev, F. A.)–290 [540]

Adamov, M. N. and V. P. Bulychev. Dependence of the Quadrupole Moment of the Hydrogen Molecule on Internuclear Distance–453 [835]

Adrianova, I. I. and Z. V. Nesterova. Investigation of Broad-Band SHF Light Modulation in the Case of Fourfold Passage of Light through an Electrooptic Crystal–303 [566]

Aleinikov, V. A. Use of an Electron Gun to Determine the Nature of Collisions of the Second Kind in a Mercury-Helium Mixture–15 [31]

Aleksandrov, E. B. A Certain Misunderstanding Concerning Counting Photon Coincidences–541 [1000]

Aliev, M. R. (see Iorish, V. S.)–478 [883]

Alperovich, L. I. (see Babaev, T. B.)–435 [810]

Altaiskaya, A. V. (see Bakhshiev, N. G.)–26 [51]

_____. (see Bakhshiev, N. G.)–486 [897]

Altman, E. L. and S. A. Kazantsev. Determination of the $^2P_{1/2}$ Levels of Cesium and Rubidium from Zero Magnetic Field Crossings–432 [805]

Altman, E. L. Determination of the Lifetime of the $8^2P_{1/2}$ Level of Cesium from Its Intersections in a Zero Magnetic Field Under Excitation by the 388.865 nm Helium Line–556 [1029]

Andramonov, V. S. (see Nesmelova, I. M.)–397 [737]

Andreeva, A. I. (see Strezhnev, S. A.)–426 [796]

Andrianova, I. I., V. B. Volkonskii, E. I. Ivanov, and M. P. Chaika. Effect of the Loss Anisotropy on the Natural Oscillations of a Resonator with an Electrooptic Crystal–533 [986]

Anisimov, V., K. Burshtein, E. Bogoyavlenskaya, and O. Karpukhim. Competition of Triplet-Triplet and Triplet-Singlet Energy Transfer in Polymers–438 [814]

Antipenko, B. M. and V. L. Ermolaev. Effect of a Change in Anion Concentration upon Radiationless Energy Transfer Between Rare-Earth Ions in Liquid Solutions. 1–504 [931]

Arapov, B. A. (see Lukantsever, Yu. L.)–267 [498]

Aristov, A. V., E. N. Viktorova, D. A. Kozlovskii, and V. A. Kuzin. The Relationship between the Lasing Threshold and the Quantum Yield of the Fluorescence of Organic Phosphors–293 [546]

Arkhangelskaya, V. A. and P. P. Feofilov. Total Antiresonance in CaF_2-Dy Crystals with Color Centers –657 [1219]

Arman, M. G. (see Kraulinya, E. K.)–658 [1221]

Arsenev, P. A. (see Azamagov, Z. T.)–156 [289]

Aslanyan, V. M. and D. M. Minasyan. Theory of the Faraday Effect for Diamagnetic Molecules–201 [375]

Astakhov, A. V. (see Levshin, V. L.)–624 [1159]

Atakhodzhaev, A. K. (see Sagitova, E. V.)–250 [465]

Avdonin, V. P. (see Varenko, G. D.)–36 [72]

_____. (see Varenko, G. D.)–153 [284]

_____. (see Begak, O. Yu.)–442 [820]

Azamagov, Z. T., P. A. Arsenev, and M. V. Chukichev. Spectra of Gadolinium Aluminum Yttric Garnet Single Crystals–156 [289]

Babaev, T. B. and L. I. Alperovich. Calculation of the Influence of the Effective Light Wave Field on the Electronic Spectra of Solutions and Films of Chlorophyll a–435 [810]

Babenko, S. D. and V. A. Bendersky. Photoeffect in Concentrated Solutions of Aromatic Hydrocarbons. III. Triplet-Triplet Annihilation and Photoconductivity of Pyrene in Polar Solvents–616 [1144]

Bagryantseva, E. A. (see Bochkova, O. P.)–232 [431]

Bakeev, A. A., R. E. Robinskii, and I. P. Shirokova. Absorption of Radiation in a High-Pressure Argon Pulsed Discharge–318 [594]

Bakhshiev, N. G., V. P. Volkov, and A. V. Altaiskaya. Intermolecular Interactions and the Spectra of Molecules in Multicomponent Solutions. II. Spectroscopic Method for Studying the Composition of the Solvate Sheaths of Molecules–26 [51]

_____ **and O. V. Sverdlova.** On the Role of Fluctuation Processes in the Broadening of Electronic-Vibrational Absorption Bands in Liquids and Solutions–91 [177]

_____. (see Girin, O. P.)–147 [273]

_____, **I. V. Piterskaya, and A. V. Altaiskaya.** Nature of the Failure of the Universal Relation Between Absorption and Fluorescence Spectra in Viscous Solutions–486 [897]

_____. (see Mazurenko, Yu. T.)–490 [905]

Bakhshieva, G. F., V. E. Karapetyan, A. M. Morozov, L. G. Morozova, M. N. Tolstoi, and P. P. Feofilov. Optical Constants, Luminescence, and Stimulated Radiation of Single Crystals of Lanthanum Niobate Activated by Neodymium–38 [76]

Balakh, M. Ya. (see Lisitsa, M. P.)–661 [1225]

Balashov, V. V., S. I. Grishanova, I. M. Kruglova, and V. S. Senashenko. Resonance Photoionization of Helium and Helium-Like Ions–466 [859]

Baryshev, N. S. (see Nesmelova, I. M.)–397 [737]

Baskakova, Z. A. (see Korolyov, F. A.)–605 [1125]

Batyaev, I. M. (see Tolstoi, M. N.)–389 [722]
Begak, O. Yu., V. P. Avdonin, and B. T. Plachenov. Luminescence of KCl-Eu Crystals–442 [820]
Beigman, I. L., L. A. Vainshtein, and V. P. Shevelko. The Effect of Polarization of the Atomic Core on the Oscillator Strengths and Photoionization Cross-Sections of Alkali Element Atoms–229 [425]
Belous, V. M., A. L. Kartuzhanskii, V. I. Malvienko, and L. I. Shur. The Dependence of the Temperature Quenching of the Luminescence of Photoemulsion Layers on Excitation Density, and Its Connection to the Temperature Behavior of Sensitivity–168 [311]
____, **N. A. Orlovskaya, and V. K. Marinchik.** Mechanism of the Flashlike Rise of the Luminescence in Silver Halides–518 [955]
Belozerov, A. F. and V. T. Chernykh. Production of Image Holograms with a Mach-Zehnder Interferometer in the Case when a Gas Stream Flows Around the Object–552 [1022]
Belyaevskaya, L. M. (see Bortkevich, A. V.)–371 [688]
Belyaevskaya, N. M. (see Zolotarev, V. M.)–104 [195]
Benderskii, V. A. (see Stunzhas, P. A.)–150 [278]
____. (see Stunzhas, P. A.)–261*[487]
____. (see Babenko, S. D.)–616 [1144]
Berezhinskii, L. I. (see Lisitsa, M. P.)–661 [1225]
Beridze, D. K. and G. R. Dzhobava. Study of the Multiple Scattering of Light. I.–271 [504]
Beterov, I. M., Yu. A. Matyugin, and V. P. Chebotaev. Resonance Exchange of Excitation in the Case of Resonance Radiation Trapping in the Neon Laser–191 [357]
Biryulina, L. V. (see Kozulin, A. T.)–135 [248]
Blank, V. A. (see Sorokin, O. M.)–634 [1178]
Blyumenfeld, L. A. (see Stunzhas, P. A.)–150 [278]
Bobovich, Ya. S. and A. V. Bortkevich. Stimulated Raman Scattering Inside and Near Absorption Bands–56 [112]
____. (see Zolotarev, V. M.)–104 [195]
____ **and A. V. Bortkevich.** Induced Scattering and Luminescence Processes in Crystallized Solutions of Cyanine Dyes–254 [474]
____. (see Bortkevich, A. V.)–371 [688]
Bochkova, O. P. and N. V. Chernysheva. Excitation of Bands in the First Negative System of Na_2^+ by $2^{1,3}S$ and $2^{1,3}P$ He Atoms–17 [35]
____. Excitation of Xenon and Krypton Atoms by Metastable Argon Atoms in the Afterglow of Ar-Kr and Ar-Xe–88 [173]
____ **and E. A. Bagryantseva.** Excitation of the $4D_j$ Levels of Zinc by Mercury Atoms in the 7^3S_1 State in the Afterglow of a Zn-Hg-Kr–232 [431]
____. Sensitized Fluorescence of Metal Vapor Mixtures–558 [1032]
Bogoyavlenskaya, E. (see Anisimov, V.)–438 [814]
Boitsov, V. F. and I. A. Merkulov. Astigmatic Resonators with Mirrors of Variable Reflectance–295 [550]
Bokhan, P. A. The Excitation of Metastable Levels in the np^4 Configurations–459 [846]
Bokov, O. G., L. Sh. Shekhter, and M. V. Yudovich. The Relationship Between the Nonlinear Polarizability Tensors of Molecules and the Retarded Green's Functions of the Electromagnetic Field–124 [228]
Boldeskul, A. E. and V. E. Pogorelov. Experimental Evaluation of the Nature of Rotational Brownian Motion from the Width of Vibrational Band Contours in Molecular Spectra–248 [462]
Bolotnikova, T. N. and O. N. Sichkar. Effect of Ethyl Bromide on the Probability of Intercombination Transitions of Aromatic Hydrocarbons in Frozen n-Paraffin Solutions–21 [43]
____, **O. N. Sichkar, and O. Yu. Strohkirch.** Effect of Ethyl Bromide on the Quasiline Luminescence and Absorption Spectra of Diphenyl–87 [172]
____ **and F. I. Gurov.** On the Concentration Dependence of the Spectra of Frozen n-Paraffin Solutions–94 [182]
____ **and Yu. I. Glushkov.** Nature of the Incorporation of Aromatic Hydrocarbon Molecules into Paraffin under Shpolskii's Effect Conditions–612 [1138]
Bonch-Bruevich, A. M., N. N. Zatsepina, T. K. Razumova, G. M. Rubanova, I. F. Tupitsin, and V. N. Shuvalova. Generation and Spectral Characteristics of Certain Polymethine Dyes–51 [100]
____, **S. E. Potapov, and Ya. I. Khanin.** Saturating Absorption at a Wavelength of 1.06μ in Glass–110 [203]
Bondarenko, V. E. (see Tsukerman, S. V.)–496 [914]
Borgdanova, I. P. and V. D. Marusin. Dependence of the Excitation Transfer Efficiency in Helium on the Gas Temperature–349 [645]
Bortkevich, A. V. (see Bobovich, Ya. S.)–56 [112]
____. (see Bobovich, Ya. S.)–254 [474]
____, **Ya. S. Bobovich, and L. M. Belyaevskaya.** On the Linear Structure of Secondary Luminescence Spectra of Vitrified Kryptocyanine Solutions–371 [688]
Bozhkov, A. I., F. V. Bunkin, and M. V. Fedorov. Stimulated Light Scattering from the Surface of a Liquid of Arbitrary Viscosity–58 [116]
Braun, M. A., Yu. Yu. Dmitriev, and L. N. Labzovskii. Relativistic Corrections to the Levels of Multi-Electron Atoms in the Self-Consistent-Field Approximation–332 [615]
Burtseva, V. M. (see Ershov, O. A.)–84 [167]
Buinov, G. N., A. V. Lukin, and K. S. Mustafin. Scattering Function and Image Quality in Holography–410 [762]

____, **A. V. Lukin, and K. S. Mustafin.** The Effect of Spatial Coherence on the Characteristics of Holograms–550 [1018]

Bulychev, V. P. (see Adamov, M. N.)–453 [835]

Bunkin, F. V. (see Bozhkov, A. I.)–58 [116]

Burshtein, K. (see Anisimov, V.)–438 [814]

Chaika, M. P. (see Rityn, E.)–344 [636]

____. (see Mashinskii, A. L.)–589 [1093]

____. (see Andrianova, I. I.)–533 [986]

Chalyi, A. V. Intensity Distribution of Scattered Light in the Precritical Region for Single Component Systems under a Gravitational Effect–75 [148]

Chebotaev, V. P. (see Beterov, I. M.)–191 [357]

____. (see Vasilenko, L. S.)–584 [1085]

Cherkasov, A. S. and I. E. Obyknovennaya. Mixed Naphthacene Eximers with some Polycyclic Aromatic Compounds–614 [1141]

Chekushin, S. I. and E. V. Titov. On the N–H Stretching Vibration Frequencies of Carboxylic Acid Hydrazides–440 [817]

Cherenkovskii, V. (see Rityn, E.)–344 [636]

Chernenko, V. P. (see Saitov, F. N.)–630 [1171]

Chernykh, V. T. (see Belozerov, A. F.)–552 [1022]

Chernysheva, N. V. (see Bochkova, O. P.)–17 [35]

____. An Investigation of the Excitation of the First Negative Band System of N_2^+ in a High-Frequency Helium-Nitrogen Discharge–241 [448]

Chikalova-Luzina, O. P. and Yu. A. Sharonov. Artifacts in Measurements of the Faraday Effect–225 [419]

Chirkov, V. N. and A. V. Yakovleva. A Study of the Excitation of Xenon by Active Nitrogen–237 [441]

Chornii, Z. P. (see Lyskovich, A. B.)–163 [302]

Chukichev, M. V. (see Azamagov, Z. T.)–156 [289]

Davidova, I. N. (see Denisyuk, Yu. N.)–178 [331]

____. (see Gurev, K. I.)–499 [921]

Denisyuk, Yu. N. (see Sukhanov, V. I.)–63 [126]

____. (see Staselko, D. I.)–174 [323]

____ **and I. N. Davidova.** Averaging of Wavefronts by Holographic Methods–178 [331]

Deryugin, I. A., Yu. A. Kuznetsov, and V. D. Tronko. Photoelectric Infrared Polarimeter–222 [415]

Desai, Sh. K. and Yu. M. Kagan. The Excitation of a Helium-Neon Mixture in a Hollow Cathode. I–234 [435]

____ **and Yu. M. Kagan.** On the Excitation of a Helium-Neon Mixture in a Hollow Cathode. Part 2–352 [650]

Dmitriev, Yu. Yu. and M. S. Yurev. Variational Estimates of Upper and Lower Limits for the Lamb-Shift Energy–316 [591]

____. (see Braun, M. A.)–332 [612]

Dobrodeev, N. A. (see Vdovin, Yu. A.)–438 [814]

Dodonova, N. Ya. (see Vinogradov, I. P.)–86 [170]

Dolgov-Savelev, G. G. and V. E. Panchenko. Electron-Excitation Cross Sections for X-Ray Series of Chlorine, Argon, and Xenon–575 [1065]

Domelunksen, V. G. and T. B. Tolchinskaya. Laser Oscillations in a Three-Mirror Non-Coordinated Resonator–95 [183]

Doronina, V. I., Yu. V. Konobeyev, and Sh. D. Khan-Magometova. Effect of the β Radiation of Tritium on Luminescence and Energy Transfer in Anthracene–436 [811]

Drichko, N. M. Achromatic Compensator for Birefringent Wave Differences–66 [132]

Dubrovskaya, I. I. (see Parshin, P. F.)–419 [781]

Dukarevich, Yu. E. Noncoherent Fourier Optical Imaging Systems. I–640 [1190]

Dyakov, Yu. E. Calculation of the Intensities of the Stokes Components in Stimulated Raman Scattering in a Lossy Medium–100 [189]

Dymke, N. (see Nedzvetskii, D. S.)–41 [82]

Dzhagarov, B. M. Nonradiative Transitions in Molecules of Various Porphyrins–33 [66]

Dzhobava, G. R. (see Beridze, D. K.)–271 [504]

Efimov, A. A. and R. N. Nurmukhametov. Electron Spectra and Structure of Indigo Diketone Dye Molecules–29 [58]

Egorova, V. F. (see Galaktionova, N. M.)–49 [96]

____. (see Galaktionova, N. M.)–404 [751]

Elchiev, M. N. (see Imanov, L. M.)–136 [251]

Ermolaev, V. L. and E. B. Sveshnikova. Independence of the Quantum Yield of Rare-Earth Luminescence on the Wavelength of the Exciting Light in Solvents Containing H and D–98 [186]

____, **N. A. Kazanskaya, A. A. Petrov, and Yu. I. Kheruze.** Charge Transfer Bands in Complexes of Rare-Earth Ions with Aromatic Acids–113 [208]

____ **and E. B. Sveshnikova.** Singlet-Triplet Energy Transfer in Liquid Solutions–324 [601]

____. (see Antipenko, B. M.)–504 [931]

____. (see Kazanskaya, N. A.)–619 [1150]

Ershov, O. A. (see Ershova, T. I.)–24 [47]

Ershov, O. A. and V. M. Burtseva. Analysis of the Long-Wavelength X-Ray Reflection Spectrum of KCl by the Kramers-Kronig Method–84 [167]

Ershova, T. I., O. A. Ershov, V. I. Vysotskii, and V. A. Stonik. The Ultraviolet Absorption Spectra of Some Hydroacridines–24 [47]

Erybasheva, L. F. (see Ivanov, V. N.)–287 [535]

Evarestov, R. A. Model-Potential Approximation in the Theory of Impurity F-Aggregate Color Centers in Mixed Alkali-Halide Crystals–384 [712]

Fadeev, A. P. (see Zhelnov, B. L.)–400 [744]

Faidysh, A. N. 18th Conference on Luminescence (Molecular Luminescence)–115 [211]

Fedina, T. A. (see Losev, V. V.)–226 [420]
Fedorov, M. V. (see Bozhkov, A. I.)–58 [116]
Feltsan, P. V. and M. M. Povch. Excitation of Argon Ions by Electron-Atom Collisions–119 [217]
Feovilov, P. P. (see Bakhshieva, G. F.)–38 [76]
____. (see Arkhangelskaya, V. A.)–657 [1219]
Filatova, L. S. (see Romanov, V. P.)–447 [827]
Folin, K. G. (see Telegin, G. G.)–189 [353]
Fradkin, E. E. and L. M. Khayutin. Competition of Oppositely Travelling Waves in a Gas Ring Laser in a Longitudinal Magnetic Field–45 [89]
____. Effect of the Distribution of Point Losses in the Generation of Oppositely Travelling Waves in a Gas Ring Laser–227 [422]
Frankevich, E. L. (see Rusin, B. A.)–501 [926]
Fromzel, V. A. (see Galaktionova, N. M.)–404 [751]
Furman, Sh. A. Effect of Temperature, Angle of Incidence, and Dispersion of Index of Refraction of Layers on the Position of the Pass Bands of a Dielectric Narrow-Band Filter–218 [407]
____ **and M. D. Levina.** Investigation of Temperature Dependence of Optical Properties of Dielectric Narrow-Band Filters–412 [766]
Futorskii, D.-D. L. (see Nosenko, A. E.)–160 [297]
Galaida, V. T. (see Vlasov, N. G.)–455 [838]
Galaktionova, N. M., G. A. Garkavi, V. F. Egorova, and A. A. Mak. Investigation of a Continuously Operating YAG-Nd^{3+} Crystal Laser–49 [96]
____, **G. A. Garkavi, V. F. Egorova, A. A. Mak and V. A. Fromzel.** Selection of a Single Longitudinal Mode in Solid-State Lasers–404 [751]
Galpern, D. Yu. Aberration Potentials–420 [784]
Garkavi, G. A. (see Galaktionova, N. M.)–49 [96]
____. (see Galaktionova, N. M.)–404 [751]
Gastilovich, E. A. (see Shigorin, D. N.)–132 [241]
____, **D. N. Shigorin, K. V. Shukova, and A. M. Sklyanova.** Absorption Band Intensities in the Infrared Spectra of Organo-Tin Derivatives of Acetylene –481 [889]
Gembarzhevskii, G. V., N. A. Generalov, G. I. Kozlov, and D. I. Roitenburg. On the Continuous Absorption of Partially Ionized Xenon in the Visible Region of the Spectrum–593 [1101]
Generalov, N. A. (see Gembarzhevskii, G. V.)–593 [1101]
Gerasimov, F. M., E. A. Yakovlev, I. V. Peisakhson, and B. V. Koshelev. Concave Diffraction Gratings with Variable Spacing–423 [790]
____, **V. P. Sergeev, I. A. Teltevskii, and V. V. Sergeev.** Optical-Electronic Tracking System for Controlling the Fabrication of Diffraction Gratings–643 [1196]
Gerbshtein, Yu. M. and Ya. M. Zelikin. On the Red Luminescence Band of Zinc Oxide–521 [963]
Gerlovin, I. Ya. and N. A. Tolstoi. Temperature Effect on the Luminescence of Concentrated Ruby–451 [833]
Gershtein, L. I. (see Krupnov, A. F.)–257 [480]
Girin, O. P., V. S. Libov, and N. G. Bakhshiev. The Relationship between the Observed and True Absorption Spectra of Molecules in a Condensed Medium VIII. The Case of Anisotropically Polarized Molecules–147 [273]
Glushkov, Yu. I. (see Bolotnikova, T. N.)–612 [1138]
Gnatyuk, L. N. (see Vinogin, Yu. P.)–85 [168]
Godnev, I. N. (see Timoshinin, V. S.)–450 [832]
Goldina, N. D., Yu. M. Kirin, and Yu. V. Troitskii. Narrowing of the Ruby Laser Spectrum by Means of a Diffraction Selector–543 [1005]
Goldfarb, Ya. L. (see Kimmelfeld, Ya. M.)–599 [1112]
Goldina, N. D. and Yu. V. Troitskii. Experiment with a Nonabsorbing Diffraction Selector of Longitudinal Modes of an Optical Resonator–319 [595]
Goldman, A. G. and I. L. Romanenko. Phosphorescence Following Electroluminescence of SrS-Cu,Eu Phosphors–269 [502]

SUBJECT INDEX

VOLUME 28, JANUARY–JUNE 1970 (pp. 1243-1253)

Numbers in brackets refer to Russian original.

ATOMIC SPECTROSCOPY

Theoretical and General

Isolation of the First Level-Crossing Signal in Sodium, A. L. Mashinskii, 108 [201]

Relativistic Corrections to the Levels of Multielectron Atoms in the Self-Consistent-Field Approximation, M. A. Braun, Yu. Yu. Dmitriev, and L. N. Labzovskii, 332 [612]

Isoelectronic series of Sulfur S I .... Cu XIV. The $3p^4$-$3p^34s$ Transition, Energy Levels, Wavelengths, and Oscillator Strengths, P. F. Gruzdev, 334 [615]

A One-Photon Transition from the Metastable Level of the Hydrogen Atom Considering Spin States, V. Ch. Zhukovskii, M. M. Kolesnikova, A. A. Sokolov, and I. Kherrmann, 337 [622]

Resonance Broadening of the L_α Line of Hydrogen, V. V. Skidan and E. Ya. Shreider, 340 [627]

Doubly Excited States of C-, N-, O-, and F-like Ions, U. I. Safronova, A. N. Ivanova, N. V. Rabinkina, and V. N. Kharitonova, 457 [841]

The Excitation of Metastable Levels in np^4 Configurations, P. A. Bokhan, 459 [846]

On a Certain Misunderstanding Concerning Counting Photon Coincidences, E. B. Aleksandrov, 541 [1000]

Multiphoton Resonance Transitions in a Two-Level System, I. V. Lebedev, 554 [1026]

Relativistic Corrections to Terms for a Number of States of Light Atoms, U. I. Safronova, 568 [1050]

Electron-Excitation Cross Sections for X-ray Series of Chlorine, Argon and Xenon, G. G. Dolgov-Savelyev and Y. E. Panchenko, 575 [1065]

Theory of Perturbations of the Autoionization Levels of Two-Electron Atoms, A. Yu. Matulis and U. I. Safronova, 580 [1076]

Accuracy of Determination of the Radiation Disintegration Constant by the Level Intersection Method, A. L. Mashinskii and M. P. Chaika, 589 [1093]

Experimental

Precise Measurement of Atomic Constants Using Level-Crossing Signals of the $3^2P_{3/2}$ State of ^{23}Na, A. L. Mashinskii, 1 [3]

The Absorption Spectrum of Strontium Vapors in the Vacuum Ultraviolet Region of the Spectrum, M. G. Kozlov and G. P. Startsev, 6 [14]

Cross-Section for Photo-Detachment of the Negative Nitrogen Ion, Yu. V. Moskvin, 356 [659]

Determination of the Lifetime of the $^2P_{1/2}$ Levels of Cesium and Rubidium from Zero Magnetic Field Crossings, E. L. Altman and S. A. Kazantsev, 432 [805]

Stark Shift in the Wavelengths of the Spectral Lines of SiI, GeI, SnI, and PbI in a Spark Discharge, E. V. Kondratyeva, 449 [830]

Resonance Photoionization of Helium and Heliumlike Ions, V. V. Balashov, S. I. Grishanova, I. M. Kruglova, and V. S. Senashenko, 466 [859]

Determination of the Lifetime of the $8^2P_{1/2}$ Cesium Level from Crossing in the Zero Magnetic Field under Excitation by the 388.865 nm Helium Line, E. L. Altman, 556 [1029]

The Continuous Absorption of Partially Ionized Xenon in the Visible Region of the Spectrum, G. V. Gembarzhevskii, N. A. Generalov, G. I. Kozlov, and D. I. Roitenburg, 593 [1101]

Photoabsorption of Barium Vapor near the Ionization Threshold, M. G. Kozlov and G. P. Startsev, 655 [1217]

Determination of Oscillator Strengths

Determination of the Relative Values of Oscillator Strengths from Atomic Absorption Measurements on Flames, B. V. Lvov, 8 [18]

The Effect of Polarization of the Atomic Core on the Oscillator Strengths and Photoionization Cross Sections of Alkali Element Atoms, I. L. Beigman, L. A. Vainshtein, and V. P. Shevelko, 229 [425]

Oscillator Strengths for the Excited States of Heliumlike Systems, U. I. Safranova, A. N. Ivanova, and V. N. Kharitonova, 313 [585]

Isoelectronic Series of Sulfur S I .... Cu XIV. The $3p^4$-$3p^34s$ Transition Energy Levels, Wavelengths and Oscillator Strengths, P. F. Gruzdev, 334 [615]

Calculation of Line Strengths from Lifetimes of Excited States, R. I. Semyonov, 341 [630]

Hyperfine Structure and Isotopic Shifts

Competition of Triplet-Triplet and Triplet-Singlet Energy Transfer in Polymers, V. Anisimov, K. Burstein, E. Bogoyavlenskaya, and O. Kalpukhin, 438 [814]

Fine Structure of Terms for a Number of States of Light Atoms, U. I. Safronova and Y. N. Kharitonova, 562 [1039]

Spectroscopy and Physics of Plasma and Gas Discharge

Energy Distribution of Electrons and Optical Properties of a High-Energy Discharge in Argon, S. D. Vagner, V. A. Virolainen, and Yu. M. Kagan, 102 [192]

A Spectroscopic Investigation of Plasma Parameters at the Outlet of a Plasmatron. I. An Investigation of the Radial Distribution of Electron Density in Argon, S. M. Golubovskaya, Yu. B. Golubovskii, and Yu. M. Kagan, 122 [223]

Absorption of Radiation in a High-Pressure Argon Pulsed Discharge, A. A. Bakeev, R. E. Rovinskii, and I. P. Shirokova, 318 [594]

The Contraction of Positive Discharge Columns, Yu. G. Kozlov, 354 [654]

Stark Shift in the Wavelengths of the Spectral Lines of SiI, GeI, SnI, and PbI in a Spark Discharge, E. V. Kondratyeva, 449 [830]

Neodymium Glass Laser with High Radiation Intensity for Production of High Temperature Plasma, M. P. Vanyukov, V. A. Venchikov, V. I. Isaenko, V. A. Serebryakov and A. D. Starikov, 544 [1008]

Disintegration of the 2^1P and 2^3P Levels of the He in a Glow Discharge, L. S. Vasilenko, V. N. Lisitsyan, G. E. Notkin, and V. P. Chebotaev, 584 [1085]

Indicatrix of the Collective Scattering of Electromagnetic Radiation in Plasma, G. D. Petrov and E. F. Yurchyuk, 647 [1204]

Collisions between Particles, Excitation of Atomic Spectra

Effective Cross Sections for the Formation of Excited Mercury Ions During Ionization of Mercury Atoms by Electron Impact, S. P. Varshavskii, A. A. Mityureva, and N. P. Penkin, 12 [26]

Use of an Electron Gun to Determine the Nature of Collissions of the Second Kind in a Mercury-Helium Mixture, V. S. Aleinikov, 15 [31]

Excitation of Bands in the First Negative System of N_2^+ by $2^{1,3}S$ and $2^{1,3}P$ He Atoms, O. P. Bochkova and N. V. Chernysheva, 17 [35]

Excitation of Xenon and Krypton Atoms by Metastable Argon Atoms in the Afterglow of Ar-Kr and Ar-Xe Discharges, P. P. Bochkova, 88 [173]

Excitation of the Resonance Lines of Krypton by Electron Impact, V. E. Yakhontova, 90 [176]

Excitation of Argon Ions by Electron-Atom Collisions, P. V. Feltsan and M. M. Povch, 119 [217]

Excitation of the $4D_J$ Levels of Zinc by Mercury Atoms in the 7^3S_1 State in the Afterglow of a Zn-Hg-Kr Discharge, O. P. Bochkova and E. A. Bagryantseva, 232 [431]

The Excitation of a Helium-Neon Mixture in a Hollow Cathode. I, Sh. K. Desai and Yu. M. Kagan, 234 [435]

A Study of the Excitation of Xenon by Active Nitrogen, V. N. Chirkov and A. V. Yakovleva, 237 [441]

Collisions of Excited Thallium Atoms in the $6^2D_{3/2}$ State with Nitrogen and Hydrogen, E. Rityn, M. Chaika, and V. Cherenkovskii, 344 [636]

On the Excitation Function of the 6^3P_0 Metastable Level of Mercury, A. I. Korotkov, 347 [641]

Dependence of the Excitation Transfer Efficiency in Helium on the Gas Temperature, I. P. Bogdanova and V. D. Marusin, 349 [645]

On the Excitation of a Helium-Neon Mixture in a Hollow Cathode. Part 2, S. H. Desai and Y. M. Kagan, 352 [650]

Effect of Collisions on the Oscillation Conditions of a Gas Ring Laser, B. L. Zhelnov and G. I. Smirnov, 402 [747]

On the Excitation of Metastable Levels in np^4 Configurations, P. A. Bokhan, 459 [846]

The Excitation Energy Transfer in the Case of the Ion-Atom Interaction, L. P. Zapesochnyi, A. N. Zavilopulo, and O. B. Shpenik, 465 [856]

Influence of Collisions and Level Degeneracy on the Saturation Effect in Gas Systems, T. Ya. Popova and S. G. Rautian, 471 [869]

Excitation Functions of Kr (II) Spectral Lines, K. I. Rozgachyov and A. T. Yaroslavtseva, 578 [1072]

MOLECULAR SPECTROSCOPY

Electronic Spectra

Theoretical and General

On the Selection of an Absorption Coefficient Model and Determination of Its Parameters for the Best Approximation of Experimental Data to the Results of Theoretical Computations, A. G. Pokrovskii and M. Ya. Rozinskii, 19 [39]

On the Role of Fluctuation Processes in the Broadening of Electronic-Vibrational Absorption Bands in Liquids and Solutions, N. G. Bakshiev and O. V. Sverdlova, 91 [177]

The Relationship Between the Nonlinear Polarizability Tensors of Molecules and the Retarded Green's Functions of the Electromagnetic Field, O. G. Bokov, L. Sh. Shekhter, and M. V. Yudovich, 124 [228]

Excited States of Alternant Hydrocarbons in the LCAO Mo Approximation. II. Singlet and Triplet Absorption Spectra of Condensed Aromatic Systems. M. M. Mestechkin, L. S. Gutyrya, and V. Poltavets, 244 [454]

Self-Consistent Field Equations for the Spin-Degenerate

State of the Arbitrary Molecular Configuration, I. G. Kaplan and A. F. Maksimov, 358 [662]
Conformally Invariant Theory of Angular Momentum, G. A. Zaitsev and E. V. Morozov, 430 [802]
Multiplet States of Diatomic Molecules with Spin-Orbital Coupling Intermediate Between Hund's Cases *a* and *b*. IV, G. A. Khachkuruzov and G. N. Yurkov, 444 [822]
Dependence of the Quadrupole Moment of the Hydrogen Molecule on Internuclear Distance, M. N. Adamov and V. P. Bullychev, 453 [835]
Polarizibility of Benzene in the Ground and Excited States, A. V. Luzanov, Yu. B. Malykhanov, and M. M. Mestechkin, 454 [836]
Nature of the Failure of the Universal Relation Between Absorption and Fluorescence Spectra in Viscous Solutions, N. G. Bakhshiev, I. V. Piterskaya, and A. V. Altaiskaya, 486 [897]
The Interpretation of the Absorption Spectrum of Solvated Electron, M. Ya. Ovchinnikova and A. A. Ovchinnikova, 522 [964]
Effect of Substitutents on the Polarization of Electronic Transitions in Naphthalene, K. R. Popov and L. V. Smirnov, 610 [1134]
Tripling of Optical Frequencies. II. A. P. Sukhorukov and I. V. Tomov, 651 [1211]

Experimental

Effect of Ethyl Bromide on the Probability of Intercombination Transitions of Aromatic Hydrocarbons in Frozen n-Paraffin Solutions, T. H. Bolotnikova and O. N. Sichkar, 21 [43]
The Ultraviolet Absorption Spectra of Some Hydroacridines, T. I. Ershova, O. A. Ershov, V. I. Vysotskii, and V. A. Stonik, 24 [47]
Intermolecular Interactions and the Spectra of Molecules in Multicomponent Solutions. II. Spectroscopic Method for Studying the Composition of the Solvate Sheaths of Molecules, N. G. Bakhshiev, V. P. Volkov, and A. V. Altaiskaya, 26 [51]
Electronic Spectra and Structure of Indigo Diketone Dye Molecules, A. A. Efimov and R. N. Nurmukhametov, 29 [58]
Generation and Spectral Characteristics of Certain Polymethine Dyes, A. M. Bonch-Vruevich, N. N. Zatsepina, T. K. Razumova, G. M. Rubanova, I. F. Tupitsin, and V. N. Shuvalova, 51 [100]
Effect of Ethyl Bromide on the Quasiline Luminescence and Absorption Spectra of Diphenyl, T. N. Bolotnikova, O. N. Sichkar, and O. Yu. Shtrokirkh, 87 [172]
On the Concentration Dependence of the Spectra of Frozen n-Paraffin Solutions, T. N. Bolotnikova and F. I. Gurov, 94 [182]
Charge Transfer Bands in Complexes of Rare-Earth Ions with Aromatic Acids, V. L. Ermolaev, N. A. Kazanskaya, A. A. Petrov, and Yu. I. Kheruze, 113 [208]
Changes in the Electronic Spectra of Dissolved Molecules Observed under Different Crystallization Conditions of Solvents, E. G. Moisya and L. G. Mazurok, 127 [232]
On an Intercombination Transition of the N_2 Molecule, I. Kovács, 239 [444]
An Investigation of the Excitation of the First Negative Band System of N_2^+ in a High-Frequency Helium-Nitrogen Discharge, N. V. Chernysheva, 241 [448]
Electronic Spectra of Some Anthraquinone Derivatives, A. T. Pilipenko and L. S. Savranskii, 434 [808]
Calculation of the Influence of the Effective Light Wave Field on the Electronic Spectra of Solutions and Films of Chlorophyll *a*, T. B. Babaev and L. I. Alperovich, 435 [810]
Absorption and Fluorescence Spectra of 1,4-Dipyrazolinyl-Benzenes, S. V. Tsukerman, V. P. Maslenikova, V. R. Bondarenko, and V. F. Lavrushin, 495 [914]
The Nature of Incorporation of Aromatic Hydrogen Molecules into Paraffin under Shpolskii's Effect Conditions, T. N. Bolotnikova and Yu. I. Glushkov, 612 [1138]

Vibrational Spectra

Theoretical and General

Triplet Fermi Resonance Involving Two Fundamental Vibrations of a Molecule, M. P. Lisitsa, N. E. Ralko, and A. M. Yaremko, 128 [235]
Sensitivity of the Normal Vibrations of Antimony Trihalides to Their Parameters, A. T. Kozulin and L. V. Biryulina, 135 [248]
The Relationship between the Observed and True Absorption Spectra of Molecules in a Condensed Medium. VIII. The Case of Anisotropically Polarized Molecules, O. P. Girin, V. S. Libov, and N. G. Bakhshiev, 147 [273]
Experimental Evaluation of the Nature of Rotational Brownian Motion from the Width of Vibrational Band Contours in Molecular Spectra, A. E. Boldeskul, and V. E. Pogorelov, 248 [462]
Empirical Relation Between Various Spectroscopic Constants of Diatomic Molecules, V. S. Iorish and V. I. Tyulin, 362 [671]
On the Theory of the Migration of Vibrational Excitation Energy in Water, D. N. Terpilovskii, 380 [705]
Application of the Method of Progressive Rigidity to

the Calculation of Coriolis Coupling Constants, V. S. Timoshinin and I. N. Godnev, 450 [832]
The Simplest Model of the Exictation of Vibrations in Diatomic Molecules by Slow Electrons, V. N. Soshnikov, 475 [877]
Consideration of the Symmetry of Molecules in the Calculation of Vibration-Rotation Constants, V. S. Iorish and M. R. Aliev, 478 [883]
Luminescence Spectra and Calculation of Normal Vibrations of Europium Acetylacetonate and Europium Benzoylacetonate, K. I. Guryev, N. I. Davydova, I. A. Zhigunova, V. F. Zolin, M. A. Kovner, V. A. Kudryashova and V. I. Tsaryuk, 499 [921]
Analysis of the Vibrational Spectra of Thieno (3, 2-v) Thiophene in the Gaseous, Liquid, and Crystalline, Ya. M. Kimmelfeld, M. A. Moskalyova, G. N. Zhizhin, V. P. Litvinov, S. A. Ozolin, and Ya. L. Goldfarb, 599 [1112]

Infrared Spectra

Energy Differences among Rotational Isomers of 2-Chlorobutane, O. D. Ulyanova and Yu. A. Pentin, 106 [198]
Study of the Nonplanar Vibrations of the Enol Form of Acetylacetone, D. N. Shigorin, E. A. Gastilovich, T. S. Kopteva, and N. M. Viktorova, 132 [241]
A Study of the Spectra of Molecular-Laser Gas Mixtures, V. N. Ivanov and L. F. Erybasheva, 287 [535]
On the N-H Stretching Vibration Frequencies of Carboxylic Acid Hydrazides, S. I. Chekushin and E. V. Titov, 440 [817]
Absorption Band Intensities in the Infrared Spectra of Organo-Tin Derivatives of Acetylene, E. A. Gastilovich, D. N. Shigorin, K. V. Zhukova and A. M. Sklyanova, 481 [889]

Hydrogen-Bond Spectroscopy

Internal Relation in the Water Vapor Dimer, A. A. Viktorova, S. A. Zhevakin and G. M. Zhislin, 596 [1106]

Raman Spectra

Determination of the True Values of the Parameters of Raman Lines. III. I. D. Morozova and I. F. Kovalyev, 35 [69]
Variation of Raman Line Intensities with Concentration in Binary Solutions, L. P. Kalashnikova and N. K. Sidorov, 141 [260]
A Raman Scattering Study of Intermolecular Interactions in Picoline Solutions, E. V. Sagitova, F. Kh. Tukhvatullin, and A. K. Atakhodzhaev, 250 [465]
On the Widths of Polarized Lines in Raman Spectra, I. I. Kondilenko, V. E. Pogprelov, and Khun Khue, 367 [680]
Study of the Dependence of Depolarized Raman Line Widths on the Concentration in Liquids, L. P. Kalashnikova and N. K. Sidorov, 603 [1121]

Stimulated Raman Scattering

Stimulated Raman Scattering Inside and Near Absorption Bands, Ya. S. Bobovich and A. V. Bortkevich, 56 [112]
Calculation of the Intensities of the Stokes Components in Stimulated Raman Scattering in a Lossy Medium, Yu. E. Dyakov, 100 [189]
Induced Scattering and Luminescence Processes in Crystallized Solutions of Cyanine Dyes, Ya. S. Bobovich and A. V. Bortkevich, 254 [474]
On the Linear Structure of Secondary Luminescence Spectra of Vitrified Kryptocyanine Solutions, A. V. Bortkevich, Ya. S. Bobovich, and L. M. Belyaevskaya, 371 [688]
Investigation of the Inverse Stimulated Raman Scattering in Benzene, F. A. Korolyov, Z. A. Baskakova, and V. I. Odintsov, 605 [1125]

Microwave Spectroscopy

The Rotational Constants of the Isopropyl Alcohol Molecule in the Trans-Conformation, L. M. Imanov, A. A. Abdurakhmanov, and M. N. Elchiev, 136 [251]
Microwave Spectrum, Internal Rotation, and Dipole Moment of 2-Methyl Thiophene, N. M. Pozdeev, L. N. Gunderova, and A. A. Shapkin, 138 [254]
Submillimeter Microwave Spectroscopy of Formaldehyde, A. F. Krupnov, L. I. Gershtein, V. G. Shustrov, and V. V. Polyakov, 257 [480]

Spectroscopy of Intermolecular Interactions

Intermolecular Interactions and the Spectra of Molecules in Multicomponent Solutions. II. Spectroscopic Method for Studying the Composition of the Solvate Sheaths of Molecules, N. G. Bakhshiev, V. P. Volkov, and A. V. Altaiskaya, 26 [51]
A Statistical Calculation of the Anisotropic Relaxation Time Using Intermolecular Interaction Parameters, V. S. Vikhrenko, L. A. Rott, and V. B. Nemtsev, 144 [266]
A Raman Scattering Study of Intermolecular Interactions in Picoline Solutions, E. V. Sagitova, F. Kh. Tukhvatullin, and A. K. Atakhodzhaev, 250 [465]

SPECTROSCOPY OF SOLIDS

Electronic Spectra

Eu^{2+} Centers in KI, G. D. Varenko, V. P. Avdonin, B. T. Plachenov, and V. A. Shibaev, 36 [72]

Optical Constants, Luminescence, and Stimulated Radiation of Single Crystals of Lanthanum Niobate Activated by Neodymium, G. F. Bakhshieva, V. E. Karapetyan, A. M. Morozov, L. G. Morozova, M. N. Tolstoi, and P. P. Feofilov, 38 [76]

Analysis of the Long-Wavelength X-Ray Reflection Spectrum of KCl by the Kramers-Kronig Method, O. A. Ershov and V. M. Burtseva, 84 [167]

On the Magnitude of the Inhomogenous Broadening of Neodymium Lines in Glasses, M. N. Tolstoi, 96 [185]

Saturating Absorption at a Wavelength of 1.06μ in Glass, A. M. Bonch-Bruevich, S. E. Potapov, and Ya. I. Khanin, 110 [203]

Efficiency of Excitation Energy Cumulation in BaF_2-Er Crystals, V. V. Ovsyankin, 112 [206]

Electron-Electron Double Resonance of Triplet Excitons. I. Spin Exchange of Triplet Excitons in Ion-Radical Salts, P. A. Stunzhas, V. A. Benderskii, L. A. Blymunfeld and E. A. Sokolov, 150 [278]

Monovalent Europium Centers in KI, G. D. Varenko, V. P. Avdonin, S. G. Zazubovich, and B. T. Plachenov, 153 [284]

Spectra of Gadolinium in Aluminum Yttric Garnet Single Crystals, Z. T. Azamagov, P. A. Arsenev, and M. V. Chukichev, 156 [289]

Spectroscopic Properties of $KY(MoO_4)_2$ Monocrystals Activated by Nd^{3+} Ions, A. A. Kaminskii, A. A. Pavlyuk, and P. V. Klevtsov, 157 [292]

Absorption Spectra of Ni^{2+} and Co^{2+} in $CdWO_4$, A. E. Nosenko, M. V. Pashkovskii, and D.-L. L. Futorskii, 160 [297]

Optical and Luminescence Properties of Calcium Iodide Single Crystals Activated by Tin and Lead, A. B. Kyskovich, G. M. Pentsak, Z. P. Chorni, and S. K. Zherebetskii, 163 [302]

Position of the Fundamental Absorption Edge as a Function of Temperature for Rochelle Salt and Triglycine Sulfate Crystals, I. F. Viblyi and N. A. Romanyuk, 165 [307]

Double Electron-Electron Resonance of Triplet Excitons. II. Spin Exchange of Triplet Excitons with Paramagnetic Impurity Centers, P. A. Stunzhas, V. A. Benderskii, and E. A. Sokolov, 261 [487]

Low-Temperature Photoluminescence of α-SiC(6H) Single Crystals, M. P. Lisitsa, Yu. S. Krasnov, V. F. Romanenko, M. B. Reifman, and O. T. Sergeev, 264 [492]

Structure-Sensitive Nature of the Luminescence Quenching of Induced Activator Color Centers in NaCl-Ag Crystal Phosphors, Yu. L. Lukantsever and B. A. Arapov, 267 [498]

Phosphorescence Following Electroluminescence of SrS-Cu, Eu Phosphors, A. G. Goldman and I. L. Romanenko, 269 [502]

An Investigation of Local Excitons in Naphthalene, V. I. Sugakov, 374 [695]

Spectroscopic Properties of Nd^{+3} Luminescent Centers in $SnCl_4$-$POCl_3$, M. N. Tolstoi, E. I. Lyubimov, and I. M. Batyaev, 389 [722]

Polarized Luminescence of Thallium Pair Centers in Alkali-Halide Crystals, S. G. Zazubovich, 392 [728]

Luminescence of KCl-Eu Crystals, O. Yu. Begak, V. P. Avdonin, and B. T. Plachenov, 442 [820]

Temperature Effect on the Luminescence of Concentrated Ruby, I. Ya. Gerlovin and N. A. Tolstoi, 451 [833]

Shape and Width of Zero-Phonon Lines in the Luminescence Spectrum of the KBr-O_2^- Crystal, L. A. Rebane and Yu. N. Kharchenko, 511 [943]

Luminescence of CaF_2-TRF_3 Crystals in the γ-ray Field of Co^{60}, Sh. A. Vakhidov, B. Kaipov, and G. A. Tavshunskii, 515 [949]

Mechanisms of the Flashlike Rise of the Silver Halides Luminescence, V. M. Belous, N. A. Orlovskaya, and V. K. Marinchik, 518 [955]

The Red Luminescence Band of Zinc Oxide, Yu. M. Gerbstein and Ya. M. Zelikin, 521 [961]

Temperature Dependences of the Luminescence Line Intensities of Tb^{3+} in Y_2O_3, V. L. Levshin, N. D. Maksimova, and A. V. Astakhov, 624 [1159]

Absorption Spectra of Trivalent Cerium in Fluoro-Beryllate Glasses, V. K. Zakharov, G. T. Petrovskii, G. A. Tsurikova, and D. M. Yudin, 626 [1164]

Study of the Nonisothermal Luminescence of NaCl-Ag Crystal Phosphor, F. N. Zaitov and V. P. Chernenko, 630 [1171]

Vibrational Structure in the Luminescence Spectrum of KI-Ag Phosphor, N. I. Ivanova and I. V. Nedzvetskaya, 632 [1175]

Optical Transmission and Excitation of Plasma Vibrations in Free Films of Al, In, Sn, Mg, Ge, Se, and Te in the Vacuum Ultraviolet Region of the Spectrum, O. M. Sorokin and V. A. Blank, 634 [1178]

Total Antiresonance in CaF_2-Dy Crystals with Color Centers, Y. A. Arkhangelskaya and P. P. Feofilov, 657 [1219]

Vibrational Spectra

Some Optical and Electrical Properties of Thin Chromium Hydride Films, B. P. Kryzhanovskii and B. M. Kruglov, 321 [597]

Infrared Reflectance Spectra of p-type Indium Arsenide, I. M. Nesmelova, K. Ya. Shtivelman, N. S. Baryshev, and V. S. Andramonov, 397 [737]

Analysis of the Spectra of Silicates and Germanates with $(X_3O_3)^{6-}$ Anions Using the Quasi-Isotopic Substitution Method, A. N. Lazarev and I. S. Ignatyev, 526 [971]
Analysis of the Vibrational Spectra of Thieno-(3,2-v)-Thiophene in the Gaseous, Liquid, and Crystalline States, Ya. M. Kimmelfeld, M. A. Moskalyova, G. N. Zhizhin, V. P. Litvinov, S. A. Ozolin, and Ya. L. Goldfarb, 599 [1112]
Vibrational Spectrum of Mercurous Iodide Crystal, A. I. Sibilyov and S. I. Kryukov, 649 [1208]

Color Centers

Model-Potential Approximation in the Theory of Impurity F-Aggregate Color Centers in Mixed-Alkali-Halide Crystals, R. A. Evarestov, 384 [712]
Total Anti-resonance in CaF_2-Dy Crystals with Color Centers, Y. A. Arkhangelskaya and P. P. Feofilov, 657 [1219]

LUMINESCENCE

General

The Dependence of the Temperature Quenching of the Luminescence of Photoemulsion Layers on Excitation Density, and Its Connection to the Temperature Behavior of Sensitivity, V. M. Belous, A. L. Kartuzhanskii, V. I. Matvienko, and L. I. Shur, 168 [311]
On Calculation of Cooperative Luminescence Efficiency under Stationary Conditions, Yu. A. Ivliev, 431 [804]
On Resonance Fluorescence in an External Field, R. L. Sokolovskii, 445 [824]
Nature of the Failure of the Universal Relation Between Absorption and Fluorescence Spectra in Viscous Solutions, N. G. Bakhshiev, I. V. Piterskaya, and A. V. Altaiskaya, 486 [897]
Effect of the Orientation Dipole Relaxation on Spectral, Time, and Polarization Characteristics of the Luminescence of Solutions, Yu. T. Mazurenko and N. G. Bakhshiev, 490 [905]
Emission and Absorption Spectra in a Strong Field, R. I. Sokolovskii, 559 [1033]
Photoabsorption of Barium Vapor near the Ionization Threshold, M. G. Kozlov and G. P. Startsev, 655 [1217]

Atoms and Molecules

Nonradiative Transitions in Molecules of Various Porphyrins, B. M. Dzhagarov, 33 [66]
Excitation of the Luminescence of Benzene Derivatives by Vacuum Ultraviolet Radiation, I. P. Vinogradov and N. Ya. Dodonova, 86 [170]
Independence of the Quantum Yield of Rare-Earth Luminescence on the Wavelength of the Exciting Light in Solvents Containing H and D, V. L. Ermolaev and E. B. Sveshnikova, 98 [186]
Absorption and Fluorescence Spectra of 1, 4-Dipyrazolinyl-Benzenes, S. V. Tsukerman, V. P. Maslennikova, V. P. Bondarenko, and V. F. Lavrushin, 495 [914]
Luminescence Spectra and Calculation of Normal Vibrations of Europium Acetylacetonate and Europium Benzoylacetonate, K. I. Guryev, N. I. Davydova, I. A. Zhigunova, V. F. Zolin, M. A. Kovner, V. A. Kudryashova, and V. I. Tsaryuk, 499 [921]
The Mechanism of Formation of Photocurrent and Luminescent Carriers in Tetracene Polycrystalline Films, B. A. Rusin, B. S. Yakovlev, and E. L. Frankevich, 501 [926]
Phosphorence of 4-Phenyl Benzonophenone Vapor, A. A. Kotov, 607 [1129]
Mixed Naphthacene Eximers with Some Polycyclic Aromatic Compounds, A. S. Cherkasov and I. E. Obyknovennaya, 614 [1141]
Photoeffect in Concentrated Solutions in Aromatic Hydrocarbons. III, S. D. Babenko and V. A. Benderskii, 616 [1144]

Inorganic Solids and Phosphor Crystals

Eu^{2+} Centers in KI, G. D. Varenko, V. P. Avdonin, B. T. Plachenov, and V. A. Shibaev, 36 [72]
Optical Constants, Luminescence, and Stimulated Radiation of Single Crystals of Lanthanum Niobate Activated by Neodymium, G. F. Bakhshieva, V. E. Karapetyan, A. M. Morozov, L. G. Morozova, M. N. Tolstoi, and P. P. Feofilov, 38 [76]
Structure of the Electronic-Vibrational Luminescence Spectra of Diamond Crystals, D. S. Nedzvetskii and N. Dymke, 41 [82

Organic Solids

Induced Scattering and Luminescence Processes in Crystallized Solutions of Cyanine Dyes, Ya. S. Bobovich and A. V. Bortkevich, 254 [474]
The Mechanism of Formation of Photocurrent and Luminescence Carriers in Tetracene Polycrystalline Films, B. A. Rusin, B. S. Yakovlev, and E. L. Frankevich, 501 [926]
Degradation of the Luminescence of Plastic Polystyrene Scintillators, L. Ya. Zhiltsova, E. N. Matveyeva, I. M. Stoletova, and M. D. Shafranov, 510 [941]

Energy Transfer in Luminescent Systems

Singlet-Triplet Energy Transfer in Liquid Solutions, V. L. Ermolaev and E. B. Sveshnikova, 324 [601]
A Study of the Loss of Electron Excitation Energy by

Rare Earth Ions to Solvent Vibrations Localized in Different Coordination Spheres, N. A. Kazanskaya and E. B. Sveshnikova, 376 [699]
Effect of the β Radiation of Tritium in Luminescence and Energy Transfer in Anthracene, V. I. Doronina, Yu. V. Konobeyev, and Sh. D. Khan-Magometeva, 436 [811]
Competition of Triplet-Triplet and Triplet-Singlet Energy Transfer in Polymers, V. Anisimov, K. Burstein, E. Bogoyavlenskaya, and O. Karpukhin, 438 [814]
Effect of a Change in Anion Concentration on the Radiationless Energy Transfer Between Rare Earth Ions in Liquid Solutions. I, B. M. Antipenko and V. L. Ermolaev, 504 [931]
Velocity Constants of Intramolecular Energy Transfer in Complexes of Rare Earth Ions with Aromatic Acids, N. A. Kazanskaya, V. L. Ermolaev, A. V. Moshinskaya, A. A. Petrov, and Yu. I. Kheruze, 619 [1150]
The Excitation Energy Transfer in the Case of the Sensitized Fluorescence of Hg-Cd and Hg-Zn Mixtures. E. K. Kraulinya, M. G. Arman, S. Ya. Liepa, Yu. A. Silin, and U. V. Yanson, 658 [1221]

Radioluminescence

The Radioluminescence of Organic Substances. VIII, F. Spurnii, S. F. Kilin, and I. M. Rozman, 506 [934]

X-ray Luminescence

Luminescence of CaF_2-TRF_3 Crystals in the γ-ray Field of Co^{60}, Sh. A. Vakhidov, B. Kaipov, and G. A. Tavshunskii, 515 [949]
Electron-Excitation Cross Sections for the X-ray Series of Chlorine, Argon, and Xenon, G. G. Dolgov-Savelyev, and Y. E. Panchenko, 575 [1065]

Electroluminescence

Investigation of Interference Effects in Thin Electroluminescent ZnS-Mn Films, N. A. Vlasenko, S. A. Zyno, and Zh. A. Pukhlii, 68 [135]
Phosphorescence Following Electroluminescence of SrS-Cu, Eu Phosphors, A. G. Goldman and I. L. Romanenko, 269 [502]

PHYSICAL OPTICS

Propagation of Light

Reversible and Irreversible Relaxation Processes in Gases and the Photon Echo, V. V. Samartsev, 92 [178]
The Statistical-Electrodynamic Content of Photometric Quantities and of the Basic Concepts of Radiation Transfer Theory, G. V. Rozenberg, 210 [392]
Investigation of Light-Field Fluctuations in a Turbid Medium, A. Ya. Khairullina and A. P. Ivanov, 275 [513]
Resonance Fluorescence in an External Field, R. L. Sokolovskii, 445 [824]
Stationary-Pulse Excitation of Superradiation Signals, V. P. Nagibarov and N. K. Solovarov, 537 [993]
On a Certain Misunderstanding Concerning Counting Photon Coincidences, E. B. Aleksandrov, 541 [1000]
Relativistic Transformations of Stokes Parameters and of a Coherent Matrix, V. S. Smirnov, 557 [1030]
Emission and Absorption Spectra in a Strong Field, R. I. Sokolovskii, 559 [1033]
Influence of the Doppler Effect on the Line Shape of Spontaneous Radiation, A. V. Lazarev, 572 [1060]

Nonlinear Optics

The Nonlinear Properties of an RDP Crystal, M. P. Golovei, I. N. Kalinkina, and G. I. Kosourov, 535 [991]

Polarization

Polarization Characteristics of Radiation Passed through a Scattering Layer, V. K. Polyanskii and L. V. Kovalskii, 77 [152]
Photoelectric Infrared Polarimeter, I. A. Deryugin, Yu. A. Kuznetsov, and V. D. Tronko, 222 [415]
Nonlinearity of Reversible Orientation of Photodichroism, A. M. Makushenko and O. V. Stolbova, 323 [600]
A Method for Precision-Measuring Small Angles of Rotation of the Polarization Plane of Coherent Radiation, O. F. Menshikh, 547 [1013]

Interference and Interferometers

Investigation of Interference Effects in Thin Electroluminescent ZnS-Mn Films, N. A. Vlasenko, S. A. Zyno, and Zh. A. Pukhlii, 68 [135]
Effect of Temperature, Angle of Incidence, and Dispersion of Index of Refraction of Layers on the Position of the Pass Bands of a Dielectric Narrow-Band Filter, Sh. A. Furman, 218 [407]
Effect of the Lack of Plane-Parallelism of the Interferometer in the Optical Multiplication of Lengths, V. P. Koronkevich and D. A. Solomakha, 309 [579]
Standardization of Transparent Plates for Interference Measurements, V. G. Khomazyuk, 317 [593]
Investigation of Temperature Dependence of Optical Properties of Dielectric Narrow-Band Filters, Sh. A. Furman and M. D. Levina, 412 [766]
Wide-Band Reflectors with Multilayer Dielectric Coatings, F. A. Korolev, A. Yu. Klementeva, T. F. Meshcheryakova, and I. A. Ramazina, 416 [775]
A Rapid Method of Processing Interferograms in Fourier

Spectrometry, P. F. Parshin and I. I. Dubrovskaya, 419 [781]
False Information in the Signal of a Scanning Interferometer, D. A. Solomakha and A. K. Toropov, 441 [818]
Independent Addition of Interference Fringe Systems on the Reconstructed Image, N. G. Vlasov, V. T. Galaida, and G. V. Skrotskii, 455 [838]
Production of Optical Image Holograms with a Mach-Zehnder Interferometer when a Gas Stream Flows Around the Object, A. F. Belozydrov and V. T. Chernykh, 552 [1022]
The Accuracy of Spectral Shift Measurements with Fabry-Perot Interferometers, A. M. Kubarev, 555 [1028]
Noncoherent Fourier Optical Imaging Systems. I, Yu. E. Diuarevich, 640 [1190]

Holography

On the Relationship between Spatial Frequency Spectra of a Three-Dimensional Object and Its Three-Dimensional Hologram, V. I. Sukhanov and Yu. N. Denisyuk, 63 [126]
The Effect of Transverse Mode Structure of a Radiation Source on the Image Produced by a Hologram, D. I. Staselko and Yu. N. Denisyuk, 174 [323]
Averaging of Wavefronts by Holographic Methods, Yu. N. Denisyuk and I. N. Davidova, 178 [331]
A Feasibility Study of Holographic Methods Using No Reference Beam, L. V. Kovalskii and V. K. Polyanskii, 181 [338]
Certain Features of Holograms of Focused Images, I. S. Klimenko and E. G. Matinyan, 298 [556]
Scattering Function and Image Quality in Holography, G. N. Buinov, A. V. Lukin, and K. S. Mustafin, 410 [762]
Effect of Spatial Coherence on Characteristics of Holograms, G. N. Buinov, A. V. Lukin, and K. S. Mustafin, 550 [1018]
Production of Optical Image Holograms with a Mach-Zender Interferometer, when a Gas Stream Flows Around the Object, A. F. Belozyorov and V. T. Chernykh, 552 [1022]
Use of the Nonlinear Properties of a Photoemulsion for Enhancing the Sensitivity of Holographic Interferometry, K. S. Mustafin, V. A. Seleznyov, and E. I. Shtyrkov, 638 [1186]

Diffraction and Diffraction Gratings

Study of the Diffraction of 10.6μm Radiation by a Standing Ultrasonic Wave in a Solid, L. P. Kruglikova and V. E. Terentyev, 107 [199]
The Diffraction Image of a Self-Luminous Rectangle and the Instrumental Function of a Monochromator, P. F. Parshin and A. G. Pokrovskii, 214 [399]
Effect of Diffraction at the Edges of a Focusing Lens on the Angular Distribution of the Intensity of Laser Radiation, V. V. Malaev, 315 [588]
Experiment with a Nonabsorbing Diffraction Selector of Longitudinal Modes of an Optical Resonator, N. D. Goldina and Yu. V. Troitskii, 319 [595]
Concave Diffraction Gratings with Variable Spacing, F. M. Gerasimov, E. A. Yakovlev, I. V. Peisakhson, and B. V. Koshelev, 423 [790]
Toroidal Diffraction Gratings for Seya-Namioka Monochromators, S. A. Strezhnev and A. I. Andreeva, 426 [796]
Narrowing of the Ruby Laser Spectrum by Means of a Diffraction Selector, N. D. Goldina, Yu. M. Kirin, and Yu. V. Troitskii, 543 [1005]
Optical Electronic Track System for Controlling the Process of Making Diffraction Gratings, F. M. Gerasimov, V. P. Sergeyev, I. A. Teltevskii, and V. V. Sergeyev, 643 [1196]

Reflection and Refraction

On the Possibilities of Perturbed Total Internal Reflection Spectrophotometry in the Study of the Liquid-Crystalline State of a Substance, V. M. Zolotarev, N. M. Belyaevskaya, and Ya. S. Bobovich, 104 [195]
General Theory of Reflection from a Nonuniform Layer (Vector E in the Place of Incidence), V. N. Razumovskii, 203 [378]
Nonselective Reflector Made of Milk Glass, O. M. Mikhailov, 429 [801]
Extrapolation of the Reflection Spectrum in the Kramers-Kronig Method, V. B. Tulinskii and N. I. Terentyev, 484 [894]

Scattering

Stimulated Light Scattering from the Surface of a Liquid of Arbitrary Viscosity, A. I. Bozhkov, F. V. Bunkin, and M. V. Fedorov, 58 [116]
Fluctuations of the Dielectric Constant and Light Scattering in Solutions, M. F. Vuks, 71 [141]
Intensity Distribution of Scattered Light in the Precritical Region for Single Component Systems under a Gravitational Effect, A. V. Chalyi, 75 [148]
Polarization Characteristics of Radiation Passed through a Scattering Layer, V. K. Polyanskii and L. V. Kovalskii, 77 [152]
Experimental Detection of Cooperative Effects in a Scattering Volume, A. P. Ivanov, A. Ya. Khairullina, and T. N. Kharkova, 204 [380]
Transmission of Radiation Through a Frosted Glass; Effect of a Polished Surface, V. K. Polyanskii and L. V. Kovalskii, 208 [388]
Influence of Attentuation on the Measured Angular De-

pendence of the Intensity of Critical Opalescence in Binary Liquid Mixtures, N. Yu. Golubovskii, 253 [471]
Study of the Multiple Scattering of Light. I., D. K. Beridze and G. R. Dzhobava, 271 [504]
Investigation of Light-Field Fluctuations in a Turbid Medium, A. Ya. Khairullina and A. P. Ivanov, 275 [513]
Study of the Spectral Structure of the Anisotropic Portion of the Light Scattered by α-Chloronaphthalene, N. B. Rozhdestvenskaya and L. A. Zubkov, 322 [599]
Determination of the Dispersion of Scattering Near the Critical Point Using the Scattered Light Indicatrix, Yu. D. Kolpakov and V. P. Skripov, 364 [675]
Characteristics of the Scattering of Coherent Optical Waves by a Rough Curved Surface, E. P. Ustenko, 408 [759]
Scattering Function and Image Quality in Holography, G. N. Buinov, A. V. Lukin, and K. S. Mustafin, 410 [762]
Correlation Theory of Light Scattering in Solutions, V. P. Romanov, V. A. Soloviev, and L. S. Filatova, 447 [827]

Crystal Optics and Double Refraction

Achromatic Compensator for Birefringent Wave Differences, N. M. Drichko, 66 [132]
Singular Optic Axes in Crystals of Rhombic Symmetry, A. P. Khapalyuk, 171 [317]
Laser Frequency Control by Means of Birefringent Crystals, V. P. Lopasov and M. M. Makogan, 291 [543]
Action of Double Refraction in Crystals on the Optical Rectification Effect, G. V. Krivoshchyokov and V. I. Stroganov, 653 [1214]

Magnetooptics and Electrooptics

Simultaneous Measurement of Optical and Magnetooptical Parameters, A. V. Malakhovskii, 198 [369]
Theory of the Faraday Effect for Diamagnetic Molecules, V. M. Aslanyan and D. M. Minasyan, 201 [375]
Artifacts in Measurements of the Faraday Effect, O. P. Chikalova-Luzina and Yu. A. Sharonov, 225 [419]

Optics of Thin Films

Some Optical and Electrical Properties of Thin Chromium Hydride Films, B. P. Kryzhanovskii and B. M. Kruglov, 321 [597]
Optical Transmission and Excitation of Plasma Vibrations in Free Films of Al, In, Sn, Mg, Ge, Se, and Te in the VUV Region of the Spectrum, O. M. Sorokin and V. A. Blank, 634 [1178]

LASERS

Theoretical and General

Competition of Oppositely Travelling Waves in a Gas Ring Laser in a Longitudinal Magnetic Field, E. E. Fradkin and L. M. Khayutin, 45 [89]
Study of the Modulation of Radiation in an He-Ne Laser with a Three-Mirror Resonator by Means of the Electrooptical Effect, V. R. Zaslavskaya, 47 [93]
Laser Oscillations in a Three-Mirror Non-Coordinated Resonator, V. G. Domelunksen and T. B. Tolchinskaya, 95 [183]
Noise in Linear Quantum Mechanical Devices. I. Yu. M. Golubev, 183 [342]
Effect of the Distribution of Point Losses in the Generation of Oppositely Travelling Waves in a Gas Ring Laser, E. E. Fradkin, 227 [422]
Excitation of Higher Order Modes of a Fabry-Perot Cavity by an External TEM_{00} Wave, P. V. Korolenko, A. I. Odintsov, and S. N. Tarasova, 278 [518]
Mode Volume and Radiation Power of a Laser, V. E. Privalov, 281 [524]
Quantum Noise in Laser Systems. II. Yu. M. Golubev, 283 [528]
Laser Frequency Control by Means of Birefringent Crystals, V. P. Lopasov and M. M. Makogan, 291 [543]
Astigmatic Resonators with Mirrors of Variable Reflectance, V. F. Boitsov and I. A. Merkulov, 295 [550]
Effect of Diffraction at the Edges of a Focusing Lens on the Angular Distribution of the Intensity of Laser Radiation, V. V. Malaev, 315 [588]
Variational Estimates of Upper and Lower Limits for the Lamb-Shift Energy, Yu. Yu. Dmitriev and M. S. Yurev, 316 [591]
Experiment with a Nonabsorbing Diffraction Selector of Longitudinal Modes of an Optical Resonator, N. D. Goldina and Yu. V. Troitskii, 319 [595]
Noise in the Locking Band of a Ring Laser, N. N. Rozanov, 398 [740]
The Instability of Unidirectional Radiation in a Ring Laser, B. L. Zhelnov, V. S. Smirnov, and A. P. Fadeev, 400 [744]
Divergence of the Beam from a Laser Resonator with a Coupling Aperture, B. S. Vinevich, 463 [853]
Influence of Collisions and Level Degeneracy on the Saturation Effect in Gas Systems, T. Ya. Popova and S. G. Rautian, 471 [869]
Effect of the Loss Anisotrophy on the Natural Vibrations of an Electrooptical Crystal Resonator, I. I. Adrianova, V. B. Volkonskii, E. I. Ivanov, and M. P. Chaika, 533 [986]
The Nonlinear Properties of an RDP Crystal, M. P.

Golovei, I. N. Kalinkina, and G. I. Kosourov, 535 [991]
Tripling of Optical Frequencies. II. A. P. Sukhorukov and I. V. Tomov, 651 [1211]

Gas Lasers

The Role of Multi-Stage Excitation of the Working Levels in the Argon Laser, V. V. Lebedeva, D. M. Mashtakov, and A. I. Odintsov, 187 [350]
Transients and Statistical Effects in a He-Ne Laser near the Excitation Threshold, G. G. Telegin, V. D. Ugozhaev, and K. G. Folin, 189 [353]
Resonance Exchange of Excitation in the Case of Resonance Radiation Trapping in the Neon Laser, I. M. Beterov, Yu. A. Matyugin, and V. P. Chebotaev, 191 [357]
Q-Switching of a Molecular Gas Laser by Means of Saturable Filters, V. V. Losev, V. F. Papulovskii, and T. A. Fedina, 226 [420]
A Study of the Spectra of Molecular-Laser Gas Mixtures, V. N. Ivanov and L. F. Erybasheva, 287 [535]
Fine Structure of the Superradiation Spectrum in a Neon Pulse Laser, F. A. Korolev, G. V. Abrosimov, A. I. Odintsov, and V. P. Yakunin, 290 [540]
Effect of Collisions on the Oscillation Conditions of a Gas Ring Laser, B. L. Zhelnov and G. I. Smirnov, 402 [747]

Liquid Lasers

Generation and Spectral Characteristics of Certain Polymethine Dyes, A. M. Bonch-Bruevich, N. N. Zatsepina, T. K. Razumova, G. M. Rubanova, I. F. Tupitsin, and V. N. Shuvalova, 51 [100]
The Relationship between the Lasing Threshold and the Quantum Yield of the Fluorescence of Organic Phosphors, A. V. Aristov, E. N. Viktorova, D. A. Kozlovskii, and V. A. Kuzin, 293 [546]
Spectral and Energy Characteristics of Lasers with Organic Molecules in Polymers and Toluene, Yu. V. Naboikin, L. A. Ogurtsova, A. O. Podgornyi, F. S. Pokrovskaya, V. I. Grigoryeva, B. M. Krasovitskii, L. M. Kutsyna, and V. G. Tishchenko, 528 [974]

Solid-State Lasers

Investigation of a Continuously Operating YAG-Nd^{3+} Crystal Laser, N. M. Galaktionova, G. A. Garkavi, V. F. Egorova, and A. A. Mak, 49 [96]
Efficient Second Harmonic Conversion of Neodymium Glass Laser Radiation, V. D. Volosov and M. I. Rashchektaeva, 53 [105]
Narrow Line Ruby Laser, Yu. P. Vinogin, L. N. Gnatyuk, V. A. Nikashin, V. K. Sakharov, V. K. Tarasov, and V. Ya. Tsarfin, 85 [168]
Selection of a Single Longitudinal Mode in Solid State Lasers, N. M. Galaktionova, G. A. Sarkavi, V. F. Egorova, A. A. Mak, and V. A. Fromzel, 404 [751]
Narrowing of the Ruby Laser Spectrum by Means of a Diffraction Selector, N. D. Goldina, Yu. M. Kirin, and Yu. V. Troitskii, 543 [1005]
Neodymium Glass Laser with High Radiation Intensity for Producing High Temperature Plasma, M. P. Vanyukov, V. A. Venchikov, V. I. Isaenko, V. A. Serebryakov, and A. D. Starikov, 544 [1008]

LIGHT MODULATORS

Investigation of Broad-Band SHF Light Modulation in the Case of Fourfold Passage of Light through an Electrooptic Crystal, I. I. Adrianova and Z. V. Nesterova, 303 [566]

SPECTRAL INSTRUMENTS

The Diffraction Image of a Self-Luminous Rectangle and the Instrumental Function of a Monochromator, P. F. Parshin and A. G. Pokrovskii, 214 [399]
High-Resolution Spectroscopy Using a Laser with an Absorption Cell, V. M. Tatarenkov, A. N. Titov, and A. V. Uspenskii, 306 [572]
Noncoherent Fourier Optical Imaging Systems. I. Yu. E. Dukarevich, 640 [1190]

GEOMETRICAL OPTICS AND OPTICAL TECHNOLOGY

On the Differences in the Reproduction of Two Gray Lines Lighter and Darker than the Surrounding Field Obtained by a Converting System, L. P. Moroz and Z. O. Kirilyuk, 80 [159]
Astigmatic Resonators with Mirrors of Variable Reflectance, V. F. Boitsov and I. A. Merkulov, 295 [550]
Changes in the Three-Ring Effect in Fiber-Optic Devices, D. K. Sattarov, G. Ya. Konaeva, I. P. Gryaznova, and T. D. Kulda, 300 [561]
Aberration Potentials, D. Yu. Galpern, 420 [784]

REVIEWS

F-Centers in Alkali Halides, J. J. Markham, 116 [213]
Physics of Color Centers, W. B. Fowler, ed., 117 [214]
Rotational Structure in the Spectra of Diatomic Molecules, Istvan Kovács, 325 [604]
Sensitized Fluorescence of Metal Vapor Mixtures, O. R. Bochkova, 558 [1032]
Vibrational Spectra of Benzene Derivatives, M. Kovner, 660 [1224]
Fiber Optics, M. P. Lisitsa, L. I. Berezhinskii, and N. Ya. Valakh, 661 [1225]

Lightguide Optics, V. B. Veinberg and D. K. Sattarov, 661 [1226]
Elementary Theory of the Vibrational Structure of the Spectra of Impurity Centers of Crystals, E. D. Trifonov, 662 [1226]

REPORTS

18th Conference on Luminescence (Molecular Luminescence), A. N. Faidysh, 115 [211]
First All-Union Course on Holography, G. V. Skrotskaya and V. N. Sintsov, 116 [212]
International Conference on Luminescence, A. A. Kaplyanskii, 326 [605]
All-Union School-Symposium on the Optics of Scattering Media, V. P. Kozlov and G. M. Gorodinskii, 327 [606]

AUTHOR INDEX

VOLUME XXIX, JULY–DECEMBER 1970 (pp. 1169-1181)

[Numbers in brackets refer to Russian original]

Abdullaev, A. A. (see Kislovskii, L. D.)–393 [787]

Adamov, M. N. and Yu. B. Malykhanov. Dipolar Polarizability of Molecules of Alternant Hydrocarbons–245 [457]

Agabekyan, A. S. Resonance Energy Transfer in Media Having Nonuniform Broadening of Spectral Lines –37 [71]

Agekyan, V. T. Exciton Absorption and Symmetry of Energy Levels in SnO_2–395 [741]

_____. Absorption Spectrum of SnO_2 in Magnetic and Electric Fields–487 [916]

Akhunov, T. F. (see Perelygin, I. S.)–276 [516]

SUBJECT INDEX

VOLUME 29, JULY–DECEMBER 1970 (pp. 1182-1191)

Numbers in brackets refer to Russian original.

ATOMIC SPECTROSCOPY

Theory and Calculations

Optical Properties of an Electron Gas in a Magnetic Field, O. Ya. Savchenko, 1 [3]
Exchange Interaction of Multi-Electron Atoms, E. L. Duman and B. M. Smirnov, 229 [425]
Use of Coulomb Green Functions in Atomic Calculations. Part I, U. I. Safronova, 234 [435]
Effect of Magnetic Fields on the Accuracy of Measurement of Lifetime by the Delayed Coincidence Method, U. I. Ivanov and M. Chaika, 236 [440]
Study of Excitation Processes in an Extended Diode. I. Distribution of Electrons According to Their Energies, M. K. Dyatlov, Yu. N. Kulikov, E. P. Ostapchenko, and V. A. Stepanov, 242 [451]
Determination of Lifetimes by Interference Beats, E. I. Ivanov and M. P. Chaika, 335 [625]
Study of Excitation Processes in an Extended Diode. II. Processes of Excitation and Decay of the Levels, M. K. Dyatlov, Yu. N. Kulikov, E. P. Ostapchenko, and V. A. Stepanov, 339 [632]
Transition to the Semi-Classical Limit in Problems of Inelastic Collisions of Heavy Charged Particles, A. V. Vinogradov and A. M. Urnov, 348 [649]
Many-Electron Atom in a Two-Particle Approximation. Calculation of Lithium Atom, M. N. Zashikhin and L. N. Labzovskii, 437 [817]
Semiempirical Calculation of Oscillator Strengths for the Strontium Atom, V. A. Zilitis, 438 [821]
Theory of Intra-Multiplet Mixing in Alkali Metal Atoms During Collision, E. I. Dashevskaya, E. E. Nikitin, and A. I. Reznikov, 540 [1016]
g Factors of Neon 2s Levels, V. D. Galkin and R. I. Semenov, 544 [1021]
Change of the Probabilities and the Intensity Ratios in a Multiplet under the Influence of Inhomogenous Intermolecular Electric Fields, L. I. Grechikhin, 547 [1025]
Emission Line Profile for Resonant Parametric Interaction in Gases, A. B. Budnitskii and A. K. Popov, 550 [1032]
Charge Transfer to an Excited State, V. I. Bylkin, 552 [1036]

Experimental

General

Spectra of Multiply Ionized Aluminum. I. Al VII, VIII, E. Ya. Kononov and K. N. Koshelev, 115 [217]
Circular Polarization of Sensitized Fluorescence in a Mixture of Mercury and Thallium Vapor, E. K. Kraulinya, O. S. Sametis, and A. P. Bryukhovetskii, 227 [423]
Excitation Energy Transfer in the Sensitized Fluorescence of a Mixture of Mercury and Iodine Vapors, E. K. Kraulinya and M. L. Yanson, 239 [445]
Optical Orientation of the Odd Isotopes Hg^{199} and Hg^{201} in a Natural Isotopic Mixture of Mercury, I. F. Grinko, V. F. Terzeman, O. A. Bartenev, A. M. Skripkin, and I. A. Shushpanov, 327 [612]
Luminescence of Slow Neon Particles that Appears During Bombardment of a Carbon Film by a Beam of Fast Neon Ions, V. V. Gritsyna, T. S. Kiyan, Ya. M. Fogel, A. G. Koval, and Yu. A. Klirnovskii, 343 [641]
Sensitized Fluorescence of Hg-In with Nitrogen and Argon Admixture, E. K. Kraulinya and M. L. Yansen, 441 [827]
The Identification of Lines of K XIII, K XIV, K XV, and Fe XVIII Ions Emitted by a Laser Plasma, V. A. Boiko, Yu. P. Voinov, V. A. Gribkov, and G. V. Sklizkov, 545 [1023]

Determination of Oscillator Strengths

The Relative Values of Oscillator Strengths of Spectral Lines, V. A. Komarovskii, N. P. Penkin, and G. P. Nikoforova, 116 [220]
Oscillator Strengths of the Absorption Bands of Sm^{3+}, Eu^{3+}, Tb^{3+}, and Dy^{3+} Ions in Solution, N. A. Kazanskaya, 587 [1100]
On the Accuracy of Oscillator Strength Measurements Using the Outer Hooks of Two Closely Located Absorption Lines, A. K. Valters, 620 [1159]

Hyperfine Structure and Isotopic Shifts

Stark Shift of Spectral Lines of Al I, Ga I, In I, Tl I, Sb I, Bi I, Te I in a Spark Discharge, E. V. Kondratieva and L. I. Fomichenko, 434 [813]
A Determination of Gas Temperature using the Spectrum of an Enriched Mixture of Neon Isotopes, A. G. Zhiglinskii, L. N. Kozlovskaya, and E. N. Fafurina, 558 [1045]

Plasma and Gas-Discharge Spectroscopy

Interferometric Investigation of Acoutsic Oscillations in the Afterglow of a Pulse Discharge, Yu. G. Kozlov, 4 [8]
Experimental Study of the Contraction Effect, Yu. G. Koslov and A. M. Shukhtin, 122 [232]

Spectroscopic Study of the Discharge in Metal Tubes Used in Argon Ion Lasers, V. I. Donin, 128 [243]
Continuous Radiation of Diffuse and Contracted Arc Columns in Argon, I. A. Vasileva, Yu. Z. Zhdanova, and A. Kh. Mnatsakanyan, 345 [644]
Measurement of Plasma Parameters using the Indicatrix of Scattered Laser Radiation, G. D. Petrov, E. F. Yurchuk, and V. A. Zhuravlev, 443 [832]
Electrical and Optical Measurements in Traveling Strata in Neon, Yu. M. Kazan, N. B. Kolokolov, and V. M. Milenin, 555 [1041]

Collisions Between Particles, Excitation of Atomic Spectra

Effect of Collisions on the Interaction of Axial Modes in a Gas Laser, Yu. P. Gudkov, 68 [128]
Measurement of Excitation Functions and Excitation Cross-Sections by Electron Impact for the Spark Lines of Zn II and Cd II, V. S. Aleinikov and V. V. Ushakov, 111 [211]
The Diffusion of Metastable Atoms of Noble Gases, V. N. Lisitsyn, A. S. Provorov, and V. P. Chebotaev, 119 [226]
Excitation Functions of He I Spectral Lines Emitted Due to Collision of He^+ Ions and H_2 Molecules, G. N. Polyakova, V. F. Erko, and A. V. Zats, 219 [412]
Effective Cross Sections for the Formation of Excited Cadmium Ions During Ionization of Cadmium Atoms by Electron Impact, S. P. Varshavskii, A. A. Mityureva, and N. P. Penkin, 341 [637]
Transition to the Semi-Classical Limit in Problems of Inelastic Collision of Heavy Charged Particles, A. V. Vinogradov and A. M. Urnov, 348 [649]
The Velocity Distribution of Particles in the Case of Endothermal Collisions of the Second Kind, V. A. Dudkin, 350 [653]
Excitation of Carbon Atoms and Carbonlike Ions by Electron Impact, N. P. Poshyunaite, A. V. Lyash, and A. B. Bolotin, 424 [799]
The Effective Cross-Sections for Depolarizing Collisions of Cesium Atoms in the $7^2P_{1/2}$ and $7^2P_{3/2}$ States with Argon Atoms, E. L. Altman, and Yu V. Evdokimov, 431 [809]
Mechanisms of Excitation Transfer in Ionic Pairs, A. S. Moskvin and V. V. Dryzhinin, 478 [899]
Theory of Intra-Multiplet Mixing in Alkali Metal Atoms During Collision, E. I. Dashevskaya, E. E. Nikitin, and A. I. Reznikov, 540 [1016]
Charge Transfer to Zn, Cd, and Na with Excitation of Slow Zinc Ions, O. B. Shpenik, A. N. Zavilopulo, and I. P. Zapesochnii, 541 [1018]
Application of the Random Phase Method for Calculating the Excitation of Light Atoms Spectrum, Yu. Yu. Dmitriev, L. N. Labzovskii, and O. P. Sklyarov, 549 [1029]

MOLECULAR SPECTROSCOPY

Electronic Spectra

Theoretical and General

Dipolar Polarizability of Molecules of Alternant Hydrocarbons, M. N. Adamov and Yu. B. Malykhanov, 245 [457]
Determination of the Splitting of the Excited Levels of Diamagnetic Molecules by Means of Becquerel's Equation, Yu. A. Sharonov, 249 [463]
Electric Polarizabilities of Nonalternant Hydrocarbons, Yu. B. Malykhanov, 250 [466]
A New Method for Constructing the Potential Curves of Diatomic Molecules on the Basis of Spectroscopic Data. IV. The potential Curve of the Ground Electronic State of the H_2 Molecule, N. I. Zhirnov and A. S. Vasilevskii, 352 [658]
Calculation of the Franck-Condon Integrals for a Triatomic Molecule. The $1B_2 \rightarrow {}^1\Sigma_g^+$ Transition in the CO_2 Molecule, M. A. Kovner, A. V. Gorokhov, G. A. Gerasimov, and E. N. Bazarov, 356 [666]
The Quantum-Mechanical Calculation of the Force Constants of Saturated Compounds with Variable Wave Functions. The Acetylene Molecule, L. A. Gribov, B. K. Novosadov, and V. N. Timonin, 359 [671]
The Photoionization of Molecules in the Second Born Approximation, M. S. Borisov and S. I. Vetchinkin, 426 [801]
Spin-Orbit Interaction of the Electronic States of Nonplanar Aromatic Molecules, V. M. Komarov, V. G. Plotnikov, and L. V. Belousova, 533 [1006]
Electronic States of Polyatomic Molecules and the Mechanism of Their Photodissociation, A. B. Nikolskii, 560 [1049]
On the Renner Effect in the Acetylene Molecule, A. N. Petelin, 615 [1153]

Experimental

Electronic Spectra and Structure of Compounds of the γ-Pyrone Series. I. Absorption Spectra, A. A. Efimov, R. N. Nurmuchametov, and A. I. Tolmachev, 6 [11]
Photoionization Processes in Phenyl Halides, Yu. L. Sergeev, M. E. Akopyan, F. I. Vilesov, and V. I. Kleimenov, 63 [119]
Effect of the Electrode Potential on the Absorption Spectrum of a Rare-Earth Diphthalocyanine Layer, P. N. Moskalev and I. S. Kirin, 220 [414]

Determination of the Dipole Moments of Organic Molecules in the Triplet Excited State, M. I. Knyazhanskii and M. B. Stryukov, 252 [469]
Spectroscopic Study of the Phenothiazine Dye-Polyvinyl Alcohol Bond: Electronic Spectra, N. V. Platonova, K. R. Popov, I. I. Shamolina, and L. V. Smirnov, 254 [473]
Absorption Hot Bands of the Shumann-Runge Oxygen System, V. N. Snopko, 445 [835]
Study of the Intensity Distribution in the Vibronic Spectra of Polyatomic Molecules, V. P. Klochkov and V. L. Bogdanov, 458 [862]
Effect of Base Cations on the Spectral Properties of Phosphorated Solutions of Silver, M. U. Belyi, T. V. Zashivailo, I. Ya. Kushnirenko and E. S. Yunusova, 498 [937]
Spectral Distribution of the Quantum Efficiency of Optical Sensitization of the Photoeffect, I. A. Akimov and A. M. Meshkov, 500 [941]
Absorption Spectra and Model of the Molecule of Rare-Earth Diphthalocyanines, P. N. Moskalev and I. S. Kirin, 612 [1149]

Vibrational Spectra

Theoretical and General

Different Methods for Calculating Intensities in the Vibrational Spectra of Molecule, B. S. Averbukh and L. S. Mayants, 9 [17]
On the Reduction of the Order of the Nonlinear Equations for the Determination of the Elements of the Potential Energy Matrix from Experimental Data, A. G. Vasiliev and B. N. Levinsky, 135 [259]
Study of the Relaxation Time for the Vibrational Energy of the NO Molecule by Means of the Spectrophone, P. V. Slobodskaya and N. F. Tkachenko, 138 [263]
Matrix Expression and Some Properties of the Inertia Defect, E. I. Kredentser and L. M. Sverdlov, 272 [508]
Calculation of the Frequencies and Forms of the Normal Vibrations of Imidazole and Its Deuterium Derivatives, Yu. D. Kanaskova, I. A. Garbuzova, Yu. A. Penshin, and B. I. Sukhorukov, 274 [511]
Frequencies of ZrF_4 (Gas) Normal Vibrations According to Thermodynamic Data, I. N. Godnev, A. M. Aleksandrovskaya, and A. S. Sverdlin, 362 [676]
Calculation of Frequencies and Shapes of Normal Vibrations for Pyrimidine and Pyrimidine-d_4, Yu. D. Kanaskova, Yu. A. Pentin, and B. I. Sukhorukov, 363 [679]
Method of Calculating the Derivatives of Normal Vibrational Frequencies of Polyatomic Molecules, D. A. Knyazev, D. A. Denisov, and A. A. Ivlev, 432 [810]
The Effect of Bending Vibrations of the Bond Being Broken on the Probability of Predissociation of Polyatomic Molecules, V. G. Plotnikov, 453 [852]
Theory of the Vibrations of Coupled Polymer Chains and Crystals, L. A. Gribov, 465 [876]
Applicability of Some Approximate Methods for Solving the Inverse Vibrational Problem, M. A. Kovner and A. A. Terekhov, 532 [1005]
Temperature Dependence of the Vibrational Energy Distribution Function of Molecular Ions, V. A. Vlaskov, A. A. Ovchinnikov, and V. N. Komarov, 534 [1008]
Fermi Resonance in the Methoxy Group, I. L. Babich, I. I. Kondilenko, P. A. Korotkov, and V. E. Pogorelov, 537 [1011]
Vibrations of a System of Weakly Interacting Molecules, Yu. I. Polyakov and Yu. Ya. Kharitonov, 564 [1056]
Isotopic Relationships between Centrifugal Distortion Constants of Polyatomic Molecules, A. P. Aleksandrov, M. R. Aliev, and V. T. Aleksanyan, 568 [1064]
Frequency Dependence of Raman Antistokes Intensities, I. I. Kondilenko, P. A. Korotkov, and G. S. Litvinov, 572 [1070]

Infrared Spectra

Infrared Spectra and Intermolecular Interactions in Ethylene Carbonate Solutions, I. M. Ginzburg and V. S. Khlevnyuk, 18 [34]
Sharp Resonances in Case of Absorption Saturation of CO_2, L. S. Vasilenko, V. P. Chebotaev, and G. I. Shershneva, 107 [204]
Optical Characteristics of Monomers and Dimers of Dyes in Solution, T. B. Babaev and L. G. Alperovich, 261 [488]
Infrared Spectra of Acetylene in Low-Temperature Matrices. I, N. I. Bagdanskis, M. O. Bulanin, and Yu. V. Fedeev, 367 [687]
Electrooptical Parameters of the Acetonitrile and Trichloroacetonitrile Molecules in Solution, V. E. Borisenko and D. N. Shchepkin, 449 [845]
A Peculiarity of the Infrared Absorption Spectra of Cyclobutane and Cyclobutane-D_1, V. T. Aleksanyan, 574 [1075]
Measurement of the Intensity of Infrared Bands of Liquids and Solutions using Thing Layers of Uneven Thickness, P. K. Khripunov, L. I. Alperovich, and V. M. Zolotarev, 576 [1078]

Raman Spectra

Dipole-Dipole Interaction and the Width of Polarized Raman Lines, A. E. Boldeskul, I. I. Kondilenko, V. E. Pogorelev, and Khun Khue, 142 [270]

Concentration Dependence of Raman Line Intensities in Two-Component Solutions, L. P. Kalashnikova and N. K. Sidorov, 225 [421]

Raman Intensities of Pyridine and Some Deuteropyridines; Calculation of the Molecular Polarizabilities and Their Derivatives with Respect to Bond Lengths for Pyridine and the Diazines, M. A. Kovner, S. K. Potapov, G. A. Rekhen, N. A. Sakhnov, and I. V. Shevchenko, 281 [523]

Frequency Dependence of Raman Antistokes Intensities, I. I. Kondilenko, P. A. Korotkov, and G. S. Litvinov, 572 [1070]

Stimulated Raman Scattering

Effect of Redistribution of Vibrational Level Populations on the Temperature Factor and the Amplification Coefficient of Stimulated Raman Scattering in Gases, B. A. Medvedev and M. A. Kovner, 12 [22]

Fermi Resonance in Induced Raman Scattering, S. K. Potapov, 224 [419]

Time Characteristics of the Stimulated Raman Scattering of Some Liquids, N. D. Shvedova, A. P. Gerasin, and L. M. Sverdlov, 285 [531]

Line Shapes and Intensities of the Stokes Components in Stimulated Raman Scattering with Two-Mode Pumping, N. I. Koroteev, 286 [534]

The Effect of the Frequency and Spectral Structure of the Incident Radiation on the Laser Raman Scattering of Organic Compounds, A. V. Bortkevich and Ya. S. Bobovich, 475 [895]

Generation of Stimulated Mandelshtam-Brillouin Scattering in Water, T. B. Stepanova, L. D. Khazov, and I. K. Nikitin, 514 [970]

Microwave Spectroscopy

The Stark Effect in Microwave Spectra, L. N. Gunderova and N. M. Posdeev, 132 [250]

Effect of Solvent on Spin-Spin Interaction Constants in PMR Spectra of Certain Organophosphorus Compounds Containing the P=O Group. III. Constants $^3J_{POCH}$ and Electron Interactions in the P=O Bond During Complex-Formation and Solvation, L. I. Vinogradov, Yu. Yu. Samitov, E. G. Yarkova, and A. A. Muratova, 264 [493]

Nuclear Quadrupole Resonance Spectra of Menshutkin Complexes on a Base of Arsenic Trichloride, V. S. Grechishkin and M. Z. Yusupov, 428 [804]

Spectra of Submillimeter Transitions Between Excited Electronic States of the NO Molecule, A. E. Basharinov and E. N. Zotova, 448 [842]

Absorption of Submillimeter Waves by Polar Liquids, V. N. Apletalin, V. V. Meriakri, and E. E. Chigryai, 619 [1157]

Spectroscopy of Intermolecular Interactions and Hydrogen Bonds

Infrared Spectra and Intermolecular Interactions in Ethylene Carbonate Solutions, I. M. Ginzburg and V. S. Khlevnyuk, 18 [34]

An Infrared Spectroscopic Investigation of the Hydrogen Bond in Chloro-Substituted Alcohols. IV. Effect of Substitution on Electron Donor Ability, I. S. Perelygin and M. A. Klimchuk, 20 [37]

The Effect of Intermolecular Hydrogen Bonding on the Intensities of the Infrared Absorption Bands of Some Derivatives of Acetylene in Solution, E. A. Gastilovich, K. V. Zhukova, D. N. Shigorin, O. G. Yarosh, and I. S. Aknurina, 22 [41]

The Effect of Hydrogen Bonding on the Electrooptical Parameters of Chloroform, V. E. Borisneko and D. N. Shchepkin, 24 [46]

Dipole-Dipole Interaction and the Width of Polarized Raman Lines, A. E. Boldeskul, I. I. Kondilenko, V. E. Pogorelev, and Khun Khue, 142 [270]

The Infrared Spectra and Hydroxyl Group Hydrogen Bonds of Chloro-Substituted Phenols. I. The Spectra of Monomeric Molecules, I. S. Perelygin and T. F. Akhunov, 276 [516]

Hydrogen Bond and the Electro-Optical Parameters of Tert-Butyl Acetylene, V. E. Borisenko and G. N. Volokhina, 365 [683]

Electrooptical Parameters of the Acetonitrile and Trichloroacetonitrile Molecules in Solutions, V. E. Borisenko and D. N. Shchepkin, 449 [845]

Proof of the Fermi Resonance Nature of the Infrared Band Structure of the Stretching Vibrations of Hydrogen bonded NH- and Nd-Groups, L. A. Dementjeva, A. V. Iogansen, and G. A. Kurkchi, 461 [868]

SPECTROSCOPY OF SOLIDS

Theoretical and General

$4f^{n-1}5d$ Configurations of Ions in Crystals, II. $4f^{14} \rightarrow 4f^{13}5d$ Spectrum of the Yb^{3+} Ion, M. V. Eremin, 53 [100]

Effect of the Electronic Structure of Ligands on the Crystal Field Parameters of CaF_2-Tu^{2+}, F. G. Anisimov and R. S. Dagis, 110 [209]

Calculation of the Limiting Lattice Vibrations for Alpha-Quartz Based on Valance-Type Force Fields, A. P. Mirgorodskii, A. N. Lazarev, and I. P. Makarenko, 289 [539]

The Vibrations of a System of Weakly Interacting Molecules, Yu. I. Polyakov and Yu. Ya. Kharitonov, 293 [547]

Energy Structure and Optical Properties of MgF_2 Crystals, N. V. Starostin, 298 [557]
Piezospectroscopic Effect and Local-Field Symmetry in Neodymium-Doped Fluorapatite Crystals, A. A. Kaplyanskii and E. G. Kuzminov, 376 [706]
Dependence of Raman Intensity of the Dimensions of the Scattering Crystal, L. N. Ovander, 390 [732]
The Mollwo-Ivey Relationship for Singlet-Triplet Transition of M Color Centers, A. A. Berezin, 430 [807]
Theory of the Vibrations of Coupled Polymer Chains and Crystals, L. A. Gribov, 465 [876]
Study of Stark Effect in Zero-Phonon Spectra of Localized Centers in Crystals Using the Method of Moments, A. A. Kaplyanskii, V. N. Medvedev, and A. P. Skvortsov, 481 [905]

Electronic Spectra

Experimental Methods for Studying the Electronic Exciton Zones of Molecular Crystals, E. F. Sheka, 41 [78]
Interaction Between Impurity Centers and Their Luminescence in $LaA10_3$-Cr, Ho Crystals, A. M. Tkachuk and Z. N. Zonn, 159 [303]
The Exciton-Phonon Interaction of CdSe and CdS-CdSe Crystals, Yu. P. Gnatenko and M. V. Kurik, 179 [339]
Electron-Phonon Interaction in $GeSe_2$, V. S. Blazhkiv, M. V. Kurik, and I. S. Zhmurko, 296 [554]
Energy Structure and Optical Properties of MgF_2 Crystals, N. V. Starostin, 298 [557]
Cation Shift of Optical Levels in Alkali-Silicate Glasses, V. A. Borgman, 323 [605]
Spectroscopic Evidence of Ordering in a Co-Crystallizing System of Polymer-Low Molecular Compound, E. G. Moisya and G. M. Semenovich, 325 [607]
Line Spectrum of Donor-Acceptance Pairs in β-SiC Crystals Doped with Aluminum, Nguen Ngok Long, D. S. Nedzvetskii, N. K. Prokofeva, and M. B. Reifman, 388 [727]
The Plasma Frequency in the Infrared Spectrum of V_2O_5 Crystals, L. D. Kislovskii and A. A. Abdullaev, 393 [737]
Exciton Absorption and Symmetry of Energy Levels in SnO_2, V. T. Agekyan, 395 [741]
X-Ray Spectra and Energy-Band Structure of Pure Sulfur, A. V. Ivanov and L. S. Timakova, 429 [805]
Absorption Spectrum of SnO_2 in Magnetic and Electric Fields, V. T. Agekyan, 487 [916]
Spectral and Luminescent Characteristics of Fluorapatite Single Crystals Activated by Rare Earth Ions, A. M. Morozov, L. G. Morozova, A. K. Trofimov, and P. P. Feofilov, 590 [1106]

Vibrational Spectra

Evidence of Nematic Order from the Raman Spectra of Vitrified Liquid Crystals of N-Anisylidene-4-(Phenylazo)-1-Naphthylamine (APN), M. Ya. Tsenter, Ya. S. Bobovich, and N. M. Belyaevskaya, 27 [53]
Long-Wavelength Infrared Reflection Spectra of Some Apatites, R. G. Knubovets, L. D. Kislovskii, and V. G. Vorobyov, 32 [62]
The Optical Constants of Amorphous SiO_2 and GeO_2 in the Valence Band Region, V. M. Zolotarev, 34 [66]
Vibronic Absorption Spectra of Aromatic Crystals, E. F. Sheka, 144 [275]
The Intensities of Low-Frequency Raman Lines for Crystals of the Monoclinic System with Two Molecules, A. V. Korshunov and L. I. Mamizerova, 222 [417]
Optical Constants and Spectral Microcharacteristics of Na_2O-SiO_2 Glasses in the IR Region of the Spectrum, O. P. Girin, Yu. N. Kondratev, and E. L. Raaben, 397 [745]
Infrared Absorption Spectra and Structural Features of SiO_2 Films on a Silicon Substrate, E. V. Potapov and A. V. Rakov, 400 [751]
Optical Constants of Ice over the Entire Infrared Regions, V. M. Zolotaryov, 599 [1125]
Infrared Absorption Spectra of Wusite with Minimum and Maximum Defects, M. P. Bogdanovich, Yu. P. Vorobyev, A. N. Men, A. V. Serebryakova, and G. I. Chufarov, 614 [1151]

Color Centers

Activatior Color Center Pairs in CsBr-In Crystals, S. G. Zazubovich and V. I. Shtanko, 58 [109]
Spectrum of Gd^{3+} Ion in $Ca_XSr_{1-X}F_2$ Crystals, R. V. Aschepkova, F. Z. Gilfanov, L. S. Livanova, M. S. Orlov, and A. L. Stolov, 153 [292]
Lifetimes of Dy^{3+} and Er^{3+} Ions in MeF_2 Crystals, I. G. Saitkulov and A. L. Stolov, 155 [295]
Spectroscopic Study of Quasi-Metal Centers in Crystals Containing Copper as an Impurity, A. B. Goldenberg and Lai Kim Tien, 181 [342]
Energy States of Mo^{3+} Ion in Glass, N. M. Bokin, G. O. Karapetyan, V. P. Kolobkov, G. A. Mokeeva, and A. G. Khudoleev, 325 [608]
Piezospectroscopic Effect and Local-Field Symmetry in Neodymium-Doped Fluorapatite Crystals, A. A. Kaplyanskii and E. G. Kuzminov, 376 [706]
Piezospectroscopic Study of the Splitting of Rotational Levels of the Nitrite Center in KCl, R. A. Avarmaa, 381 [718]
Temperature Dependences of F-Center Formation in KCl-KBr Solid Solutions, E. K. Zavadovskaya, Yu. M. Annenkov, and T. S. Frangulyan, 385 [721]

The Mollwo-Ivey Relationship for Singlet-Triplet Transition of M Color Centers, A. A. Berezin, 430 [807]
Study of Stark Effect in Zero-Phonon Spectra of Localized Centers in Crystals Using the Method of Moments, A. A. Kaplyanskii, V. N. Medvedev, and A. P. Skvortsov, 481 [905]
Polarized Luminescence of Paired Activator Centers in Nonirradiated and X-Irradiated CsBr-Ga and CsI-Ga Crystals, V. S. Osminin and S. G. Zazubovich, 491 [924]
Temperature Broadening of Pr^{3+} Spectral Lines in an $LaNbO_4$ Crystal, E. G. Reut, 596 [1110]

LUMINESCENCE

Theoretical and General

Fluorometric Method for Individual Recording of Spectra in Systems Containing Two Types of Luminescent Centers, T. V. Veselova, A. S. Cherkasov, and V. I. Shirokov, 617 [1155]

Atoms and Molecules

Delayed Fluorescence and Recombination Luminescence of Aromatic Hydrocarbon Solutions, S. D. Babenko and V. A. Benderskii, 45 [85]
The Photoeffect in Concentrated Solutions of Aromatic Hydrocarbons. IV. Temperature Dependence of Photoconductivity and Delayed Fluorescence, S. D. Babenko and V. A. Benderskii, 106 [203]
Rare-Earth Luminescence in Complexes with 1,2-Dioxybenzene-3,5-Disulphonic Acid, N. S. Poluektov, M. A. Tichehenko, and L. A. Alakaeva, 156 [298]
Circular Polarization of Sensitized Fluorescence in a Mixture of Mercury and Thallium Vapor, E. K. Kraulinya, O. S. Sametis, and A. P. Bryukhovetskii, 227 [423]
Spectral Luminescence Studies of Benzene and Some of Its Derivatives in the 120-300 nm Region at 77 K, I. P. Vinogradov, I. V. Aleshin, and N. Ya. Dodonova, 256 [477]
The Dependence of the Lifetimes of the Excited States of Phthalimides on Their Own Partial Pressures and on the Pressures of Foreign Gases, V. A. Yakovenko and L. G. Pikulik, 258 [482]
Efficiency of the Quenching by Oxygen of the Fluorescence from Complex Molecular Vapors, G. B. Tolstorozhev and N. A. Borisevich, 374 [701]
Sensitized Fluorescence of Hg-In with Nitrogen and Argon Admixture, E. K. Kraulinya and M. L. Yensen, 441 [827]
Effect of Base Cations on the Spectral Properties of Phosphorated Solutions of Silver, M. U. Belyi, T. V. Zashivailo, I. Ya. Kushnirenko, and E. S. Yunusova, 498 [937]
Bathochromic Luminescence in Solutions of Organic Dyes at Low Temperatures, A. N. Rubinov and V. I. Tomin, 578 [1082]

Inorganic Solids and Phosphor Crystals

Photochemical Change of the Valency of Impurity Rare-Earth Ions in Fluorite Type Crystals. I. Investigation Techniques. Kinetics and Quantum Efficiency for Photo-Oxidation of Ln^{2+} Ions in Crystals with Two Activators, V. A. Arkhangelskaya and M. N. Kiseleva, 149 [284]
Interaction Between Impurity Centers and Their Luminescence in $LaAlO_3$-Cr, Ho Crystals, A. M. Tkachuk and Z. N. Zonn, 159 [303]
Luminescence of Neodymium in Alkali Silicate Glasses, N. B. Brachkovskaya, G. O. Karapetyan, A. L. Reishakhrit, and M. N. Tolstoi, 172 [328]
Photochemical Change of Valency of Impurity Rare-Earth Ions in Fluorite Type Crystals. II. Kinetics and Quantum Yield of Photo-oxidation of Ions in Crystals with One Activator, V. A. Arkhangelskaya and M. N. Kiseleva, 300 [561]
Luminescence of Nonactivated NaCl Crystals, M. I. Mochenov, V. P. Avdonin, and B. T. Plachenov, 489 [920]
Polarized Luminescence of Paired Activator Centers in Nonirradiated and X-Irradiated CsBr-Ga and CsI-Ga Crystals, V. S. Osminin and S. G. Zazubovich, 491 [924]
Dependence of the Luminescence Yield of ZnS-CdS Luminophor on the Ratio of Matrix Components, V. L. Levshin and M. V. Senashenko, 495 [931]
Multiphoton Excitation of Luminescence in Indium-Activated KCl and NaBr Crystals, G. I. Aseev and M. L. Kats, 584 [1094]
The Anti-Stokes Luminescence of Ruby, I. Ya. Gerlovin and V. V. Ovsyankin, 598 [1122]
Spectral and Luminescent Characteristics of Fluoraptite Single Crystals Activated by Rare Earth Ions, A. M. Morozov, L. G. Morozova, A. K. Trofimov, and P. P. Feofilov, 590 [1106]

Organic Solids

Phosphorescence and Singlet-Triplet Absorption in Benzophenone Crystals at 4.2 K, V. I. Melnik and M. T. Shpak, 326 [610]

Energy Transfer in Luminescent Systems

Effect of an Anion Change upon the Radiationless Energy Transfer Between Rare-Earth Ions in Liquid Solutions. II. Anions of Aliphatic Carboxylic Acids, B. M. Antipenko and V. L. Ermolaev, 47 [90]
Mechanisms of Luminescence Quenching in Rare-Earth Ions and Their Complexes by Organic Compounds in

Liquid Solutions, V. L. Ermolaev and V. S. Tachin, 49 [93]
Nonradiative Energy Transfer from Tb^{3+} to Eu^{3+} Via a Mediator, V. S. Tachin and V. L. Ermolaev, 164 [311]
Phototransfer of Electrons from Organic Molecules to Eu^{3+} in Liquid Solutions, T. A. Shakhverdov, 166 [315]
Ion-to-Ion Radiationless Transfer of Electron Excitation Energy between Rare-Earth Ions in $POCl_3$-$SnCl_4$, B. M. Antipenko, I. M. Bataev, V. L. Ermolaev, E. I. Lyubimov, and T. A. Privalova, 177 [335]
Excitation Energy Transfer in the Sensitized Fluorescence of a Mixture of Mercury and Iodine Vapors, E. K. Kraulinya and M. L. Yanson, 239 [445]
Determination of the Dipole Moments of Organic Molecules in the Triplet Excited State, M. I. Knyazhanskii and M. B. Stryukov, 252 [469]
Processes and Mechanism of Deactivation of Electronic Excitation Energy in Aromatic Amines, E. B. Sveshnikova and M. I. Snegov, 265 [496]
Processes of Deactivation of the Excited State of Indole and of Its Derivatives in Aqueous Solutions. Investigation by the Method of Temperature Quenching in H_2O and D_2O, E. P. Busel, T. L. Bushueva, and E. A. Burshtein, 268 [501]
Mobility of Localized Electronic Excitation, A. V. Lukashin, 371 [696]
Ways of Deactivating the Excited State of Indole and Its Derivatives in Aqueous Solutions. Luminescence of Tryptophane in Alkaline Medium at Room Temperature, E. A. Burshtein and E. P. Busel, 580 [1087]

Other Forms of Luminescence

X-Ray Luminescence and Thermoluminescence of SrF_2 and BaF_2 Crystals Activated by Gd^{3+} and Dy^{3+} Ions, R. K. Luks and A. L. Stolov, 170 [322]
The Interaction of the Blue and Green Bands in the Emission Spectra of Zinc Sulphide, L. Sodomka, L. Dvorzhak, and Z. Kupka, 536 [1009]

PHYSICAL OPTICS

Propagation of Light

General

Resonance Energy Transfer in Media Having Nonuniform Broadening of Spectral Lines, A. S. Agabekyan, 37 [71]
An Interferometric Method Measuring Phase Fluctuations of Optically Coherent Radiation in a Randomly Nonuniform Medium, A. A. Semenov and A. N. Gordeev, 108 [206]
Statistical Properties of Multimode Optical Fields, I. A. Deryugin and V. N. Kurashov, 183 [345]
Effect of Magnetic Fields on the Accuracy of Measurement of Lifetime by the Delayed Coincidence Method, U. I. Ivanov and M. Chaika, 236 [440]
Coupling of the Micro- and Macropolarizability Tensors of Nonlinear Anistropic Dispersion Media, O. G. Bokov and L. Sh. Shekhter, 247 [460]
Determination of Lifetimes by Interference Beats, E. I. Ivanov and M. P. Chaika, 335 [625]
Absorption of Simultaneously Phase and Amplitude Modulated Radiation, A. I. Burshtein and Yu. S. Oseledchik, 411 [772]
Determination of the Statistical Characteristics of Multimode Optical Radiation using Photoelectric Measurements, I. A. Deryugin, A. A. Vishenskii, and V. N. Kurashov, 413 [776]
Development of Self-Focusing in Nonlinear Resonance Media, V. M. Arutyunyan, K. V. Karmenyan, R. M. Nagdyan, and Yu. S. Chilingaryan, 416 [783]
Interaction of a Free Electron with Two Colinear Intense Light Beams, I. V. Lebedev, 503 [948]
Saturation Effects in Semiconductor Optical Amplifiers and Filters, V. K. Konenko and V. P. Gribkovskii, 517 [975]
Contrast Law of Light Perception, V. F. Nesteruk and N. N. Porfireva, 606 [1138]

Reflection and Refraction

Refraction of Coexisting Liquid and Gaseous Benzene over a Broad Temperature Range including the Vicinity of the Critical Point, E. T. Shimanskaya, 15 [27]
Long-Wavelength Infrared Reflection Spectra of Some Apatites, R. G. Knubovets, L. D. Kislovskii, and V. G. Vorobyov, 32 [62]
Phase Shifts in Silver and Gold Thin Films, I. N. , T. I. Korneeva, N. A. Nosulenko, and A. I. Rybalka, 99 [190]
Increasing the Sensitivity of the Shadow and Interference Methods in the Study of Low Density Gas Flow, A. F. Belozerov, K. S. Mustafin, A. I. Sadykova, V. S. Fedosov, E. I. Shtyrkov, V. A. Yakovlev, and V. I. Yanichkin, 204 [384]
Perturbed Total Internal Reflection (PTIR) Spectroscopy. Use of Polarized Light in Compensative Measurements, 278 [519]
Measurement of the Degree of Depolarization of Scattered Light in the Vicinity of the Carbon Dioxide Critical Point using a Helium-Neon Laser, Yu. K. Kolpakov and V. P. Skripov, 405 [761]
Use of the Kramers-Kronig Dispersion Relationships to Calculate the Phase of the Wave Reflected from Thin Dielectric Layers, E. A. Lupashko, V. K. Miloslavskii, and I. N. Shklyarevskii, 419 [789]

Approximate Phase Shift Formulas for the Reflection of Light from Thin Films, I. N. Shklyarevskii, O. I. Shklyarevskii, and A. I. Usoskin, 609 [1144]

Scattering

Effect of the Secondary Structure on the Scattering Properties of Ground Glass Surfaces, G. M. Gorodinskii and A. N. Shestov, 320 [600]

Measurement of the Degree of Depolarization of Scattered Light in the Vicinity of the Carbon Dioxide Critical Point using a Helium-Neon Laser, Yu. K. Kolpakov and V. P. Skripov, 405 [761]

Anisotropy Fluctuations and Light Scattering Liquids, V. P. Romanov and V. A. Solovev, 470 [884]

Determination of Refractive Indices of Powdered Polycrystalline Inorganic Materials, S. A. Kutolin, O. M. Gladkikh, and M. N. Korotkevich, 601 [1129]

Crystal Optics and Double Refraction

Nonuniform Waves at the Boundary of a Uniaxial Crystal and an Isotropic Medium, F. I. Fedorov and V. V. Filippov, 29 [56]

Illumination Distribution in a Point and the Transmission Function for Birefringence in Optical Elements, V. A. Komissaruk, 93 [178]

Effect of Optical Rectification in Some Crystals, B. N. Morozov, 622 [1162]

Optical Constants

The Optical Constants of Amorphous SiO_2 and GeO_2 in the Valence Band Region, V. M. Zolotarev, 34 [66]

The Determination of Optical Characteristics of Double Layers Deposited on Substrates, I. A. Tekucheva, 102 [198]

Optical Characteristics of Monomers and Dimers of Dyes in Solution, T. B. Babaev and L. G. Alperovich, 261 [488]

Optical Constants and Spectral Microcharacteristics of Na_2O-SiO_2 Glasses in the IR Region of the Spectrum, O. P. Girin, Yu. N. Kondratev, and E. L. Raaben, 397 [745]

Optical Constants of Ice over the Entire Infrared Region, V. M. Zolotaryov, 599 [1125]

Determination of Refractive Indices of Powdered Polycrystalline Inorganic Materials, S. A. Kutolin, O. M. Gladkikh, and M. N. Korotkevich, 601 [1129]

Magnetooptics and Electrooptics

The Helical Kerr Cell, V. K. Arkhipov, E. I. Ershov, B. P. Ryseev, and R. P. Tarasov, 91 [173]

Transmission of Light Flux through a Medium with Linear and Quadratic Magnetooptical Effects, V. D. Tronko, 187 [354]

Determination of the Splitting of the Excited Levels of Diamagnetic Molecules by Means of Becquerel's Equation, Yu. A. Sharonov, 249 [463]

Study of Stark Effect in Zero-Phonon Spectra of Localized Centers in Crystals Using the Method of Moments, A. A. Kaplyanskii, V. N. Medvedev, and A. P. Skvortsov, 481 [905]

Metal Optics

Phase Shifts in Silver and Gold Thin Films, I. N. Shklyarevskii, T. I. Korneeva, N. A. Nosulenko, and A. I. Rybalka, 99 [190]

The Effect of Preparation Conditions on the Optical Properties of Silver and Copper Films, V. P. Kostyuk and I. N. Shklyarevskii, 102 [195]

Effect of Interference Phase on Light Absorption in a Semitransparent Metal Layer, E. S. Kulagin and A. V. Merkulov, 313 [587]

Interference and Interferometers

An Interferometric Method Measuring Phase Fluctuations of Optically Coherent Radiation in a Randomly Nonuniform Medium, A. A. Semenov and A. N. Gordeev, 108 [206]

Laser Ring Interferometer with Special Selective Characteristics, V. N. Kutin and B. I. Troshin, 197 [372]

Multicomponent Dispersive Interference-Polarization Filters, T. A. Vinogradova, 209 [395]

Infrared Laser-Interferometer with Phase Q-Switching, R. I. Soloukhin and Yu. A. Yakobi, 306 [573]

Theory of the Stable Two-Beam Polarization Interferometer, E. I. Butikov, A. S. Kondratev, and N. A. Priyatkin, 328 [613]

Measurement of the Intensity of Infrared Bands of Liquids and Solutions using Thin Layers of Uneven Thickness, P. K. Khripunov, L. I. Alperovich, and V. M. Zolotarev, 576 [1078]

Holography

Double-Exposure Holographic Interferometry with Reconstruction in White Light, I. S. Klimenko, E. G. Matinyan, and G. I. Rukman, 85 [160]

Reconstruction of Three-Dimensional Holograms Using an Extended Source, V. V. Aristov, V. G. Lysenko, V. B. Timofeev, and V. Sh. Shekhtman, 322 [604]

Wave Aberrations in Holographic Interferometry using Higher Diffraction Orders, K. S. Mustafin and V. A. Seleznev, 525 [990]

On the Effect of Photomaterial Nonlinearity on the Amplitude Characteristics of Holograms, Yu. N. Denisyuk, G. V. Semyonov, and N. A. Savostyanenko, 527 [994]

On the Use of a Random Reference Wave in Holographic Recording of Focused Images, I. S. Klimenko and E. G. Matinyan, 603 [1132]

Diffraction and Diffraction Gratings

Calculation of Diffraction Distribution from a Disk, P. F. Parshin and A. G. Pokrovskii, 611 [1147]

Nonlinear Optics

Coupling of the Micro- and Macropolarizability Tensors of Nonlinear Anisotropic Dispersion Media, O. G. Bokov and L. Sh. Shekhter, 247 [460]

Effect of Statistics of Exciting Radiation on the Spectrum of Generated Radiation in Nonlinear Optics, V. L. Strizhevskii, S. G. Karpenko, and A. V. Bugaev, 506 [953]

Nonlinear Optical Properties of Potassium Diphthalate Crystal, L. M. Belyaev, G. S. Belikova, A. B. Gilvarg, M. P. Golovei, I. N. Kalinkina, and G. I. Kosourov, 522 [985]

Theory of Nonlinear Dispersion in an Absorption Band, L. D. Ievleva and M. A. Kovner, 531 [1002]

Effect of Optical Rectification in Some Crystals, B. N. Morozov, 622 [1162]

LASERS

Theoretical and General

Effect of Collisions on the Interaction of Axial Modes in a Gas Laser, Yu. P. Gudkov, 68 [128]

Quantum Noise in Laser Systems. III. Yu. M. Golubev, 79 [149]

An Optical Frequency Standard with Two Absorption Cells, S. N. Bagaev, L. S. Vasilenko, and V P. Chebotaev, 83 [156]

Sharp Resonances in Case of Absorption Saturation of CO_2, L. S. Vasilenko, V. P. Chebotaev, and G. I. Shershneva, 107 [204]

Effect of Resonator Spacing on the Parameters of a Laser with a Passive Q Switch, N. R. Kulish and M. P. Lisitsa, 191 [360]

Rotating Ring Resonator with a Nonreciprocal Element, A. M. Volkov and V. A. Kiselev, 194 [365]

Laser Ring Interferometer with Special Selective Characteristics, V. N. Kutin and B. I. Troshin, 197[371]

Effect of the Nonmonochromatism of Laser Radiation on the Generation of a Second Optical Harmonic in Various Nonlinear Media, R. B. Andreev and V. D. Volosov, 199 [374]

Diffraction Splitting of Frequencies in a 3.39-μm Laser, A. D. Valuev, S. A. Savranskii, A. F. Savushkin, and B. A. Shokin, 217 [410]

Infrared Laser-Interferometer with Phase Q-Switching, R. I. Soloukhin and Yu. A. Yakobi, 306 [573]

Approximate Calculation of Oscillations in Resonators with Concave Mirrors, V. V. Lyubimov and I. B. Orlova, 310 [581]

Measurement of the Degree of Laser Coherence by Young's Method, L. G. Nazarova, 403 [757]

Combination Interaction of Two Longitudinal Modes in a Ring Laser, V. A. Vetkin and A. M. Khromykh, 407 [765]

Measurement of Plasma Parameters using the Indicatrix of Scattered Laser Radiation, G. D. Petrov, E. F. Yurchuk, and V. A. Zhuravlev, 443 [832]

Effect of Statistics of Exciting Radiation on the Spectrum of Generated Radiation in Nonlinear Optics, V. L. Strizhevskii, S. G. Karpenko, and A. V. Bugaev, 506 [953]

One Possibility of Mode Coupling in a Laser with Homogeneous Broadening, N. N. Rosanov, 510 [961]

Certain Effects Arising in the Locking Zone of a Ring Laser, A. M. Volkov and G. V. Skrotskii, 512 [965]

Generation of Stimulated Mandelshtam-Brillouin Scattering in Water, T. B. Stepanova, L. D. Khazov, and I. K. Nikitin, 514 [970]

Nonlinear Optical Properties of Potassium Diphthalate Crystal, L. M. Belyaev, G. S. Belikova, A. B. Gilvarg, M. P. Golovei, I. N. Kalinkina, and G. I. Kosourov, 522 [985]

Frequency Shift of Direct-Current Lasers, N. A. Kalinin, E. I. Latysheva, and Yu. P. Efremov, 543 [1020]

The Identification of Lines of K XIII, K XIV, K XV, and Fe XVIII Ions Emitted by a Laser Plasma, V. A. Boiko, Yu. P. Voinov, V. A. Gribkov, and G. V. Sklizkov, 545 [1023]

Gas Lasers

Observation of Interference Beats in Spontaneous Emission from a Helium-Neon Laser, E. I. Ivanov and M. P. Chaika, 66 [124]

Spectroscopic Properties of a Mercury Laser, I. M. Beterov, V. M. Klementyev, and V. P. Chebotaev, 73 [138]

Transference of the Carrier Frequency of a Modulated Signal on Coupled Transitions in Gas Lasers, M. I. Kliot-Dashinskii, 75 [141]

Mercury-Argon Laser, E. V Chisler, 109 [208]

Effects of Regular Oscillations in the Discharge on the Output Power of a He-Ne Laser, Yu. G. Zakharenko and V. E. Privalov, 124 [236]

Spectroscopic Study of the Discharge in Metal Tubes Used in Argon Ion Lasers, V. I. Donin, 128 [243]

Investigation of a Submillimeter $D_2O + D_2$ Laser, A. F. Krupnov, 217 [409]

On the Generation Mechanism of the Cadmium Vapor Laser, M. K. Dyatlov, E. P. Ostapchenko, and V. A. Stepanov, 539 [1014]

Liquid Lasers

On Third-Harmonic Generation in Impurity Crystals and Dyes, E. D. Trifonov and A. S. Troshin, 215 [407]
Generation of Stimulated Radiation in Solutions of Rhodamine 6G under Nonuniform Pumping Conditions, A. V. Aristov, D. A. Koslovskii, and A. S. Cherkasov, 221 [416]
Some Results of an Experimental Investigation of the Stimulated Emission of Solutions of Rhodamine Dyes when Pumped by a Lamp, Yu. E. Zabiyakin, V. S. Smirnov, and N. G. Bakhshiev, 304 [569]

Solid-State Lasers

On Third-Harmonic Generation in Impurity Crystals and Dyes, E. D. Trifonov and A. S. Troshin, 215 [407]
Saturation Effects in Semiconductor Optical Amplifiers and Filters, V. K. Konenko and V. P. Gribkovskii, 517 [975]

GEOMETRICAL OPTICS AND THEORY OF OPTICAL INSTRUMENTS

General

Noncoherent Fourier-Optical Imaging Systems. II, Yu. E. Dukarevich, 88 [167]
Determining the Degree of Parallelism of the Surfaces of a Plate Transparent in the IR Region Using a CO_2 Laser, Yu. N. Gromov, M. P. Kolomeev, and N. Sh. Khaikin, 202 [381]
Increase in the Resolution of Optical Systems by Means of Apodization, A. G. Ramm, 317 [594]
Effect of the Secondary Structure on the Scattering Properties of Ground Glass Surfaces, G. M. Gorodinskii and A. N. Shestov, 320 [600]
Theory of the Stable Two-Beam Polarization Interferometer, E. I. Butikov, A. S. Kondratev, and N. A. Priyatkin, 328 [613]
Resolution of Optical Systems, A. G. Ramm, 422 [794]

Aberration Theory

Effect of Optical System Aberrations on the Accuracy of the Vernier Coincidence of Lines, M. N. Sokolskii, 96 [183]
The Accuracy of Longitudinal Focusing in Optical Instruments, M. N. Sokolskii, 212 [401]

LETTERS

Correction to V. N. Soshnikov's Article "On the Simplest Model for the Excitation of Vibrations of Diatomic Molecules by Slow Electrons", V. N. Soshnikov, 625 [1167]

REPORTS

Symposium on the Spectroscopy of Crystals Activated by Ions of Rare-Earth and Transition Metals, A. A. Kaplyanskii, 624 [1165]

ANNIVERSARIES

Lev Viktorovich Lipis (on his 60th Birthday), 626 [1168]

NECROLOGY

V. L. Levshin (1896-1969), 436 [816]
